Summer 2024: Ianthé ordered 16 pairs of Loïs Kedochim glasses for her family.

***Three months after the glasses arrived**, during Christmas dinner,*

1 WhatsApp · Ianthé

We received the glasses today. Thank you for this beautiful package, very well presented, decorated, pretty colors, the Elite case, so pretty! And the glasses, absolutely perfect. Thank you, Loïs, it's very good work. The whole family will surely appreciate them. See you very soon.

2 WhatsApp · Ianthé

The twins who are staying with us on vacation wear them every evening at dinner too. Last night, the one we can never get to bed fell asleep in the armchair at the end of the meal, and when I wanted to take his glasses off, he dashed to his bed upstairs. Slept all night. Never seen anything like it. The parents are going to be amazed! We'll have more precise feedback after school starts again, when the environment is back to normal.

3 WhatsApp · Ianthé

Loïs, my Days glasses are excellent. Give us some advice on care... Should we use the focus dry, or can we wash the lenses with soap first and dry them with the focus? Can soap damage the lenses, Day and Night? Thanks. We finally have beautiful sunshine. We eat outside at lunchtime. The Days lenses are very useful then. 🥰

4 WhatsApp · Ianthé (forwarded photos)

Day glasses...

Photo taken by our daughter-in-law without us knowing....we're building a Lego orchid flower, a Christmas gift...

Come on, last photo with the Loïs Days, on Gérard and me, on the left, even if I have them on my head... I got used to them 10 times more easily than any pair I've had before ...

5 WhatsApp · Ianthé

The glasses arrived safe and sound for the first group: Sophie, Emile, Théo & Emma. Everyone is very happy, Théo says he sees better than with his latest glasses from the optician. ADOPTED!

Everyone watched the package leave at the post office with Amélie. “She didn't forget a single one,” Emma said.

Have a good afternoon, and see you tomorrow.

The video was taken at the time of the handout. They didn't wait until evening to try them on. Everyone knows that they'll need to wear them at night, after sunset.

Today, handing out the rest of the family's glasses: Armand, Anne, the twins: Aubin & Noam. The little ones are trying them on too. The parents are amazed at the quality of the frames, the little ones love the shape and the color of the temples, and everyone is blown away to have their name engraved on their pair of glasses.

Everyone loved the Elite case, your name written on the focus wipe, which matches the E.cases.

As for me, I can't do without mine, and they help me rest in the evening. For Gérard, no more headaches since he started wearing his Night glasses to have dinner indoors and watch TV.

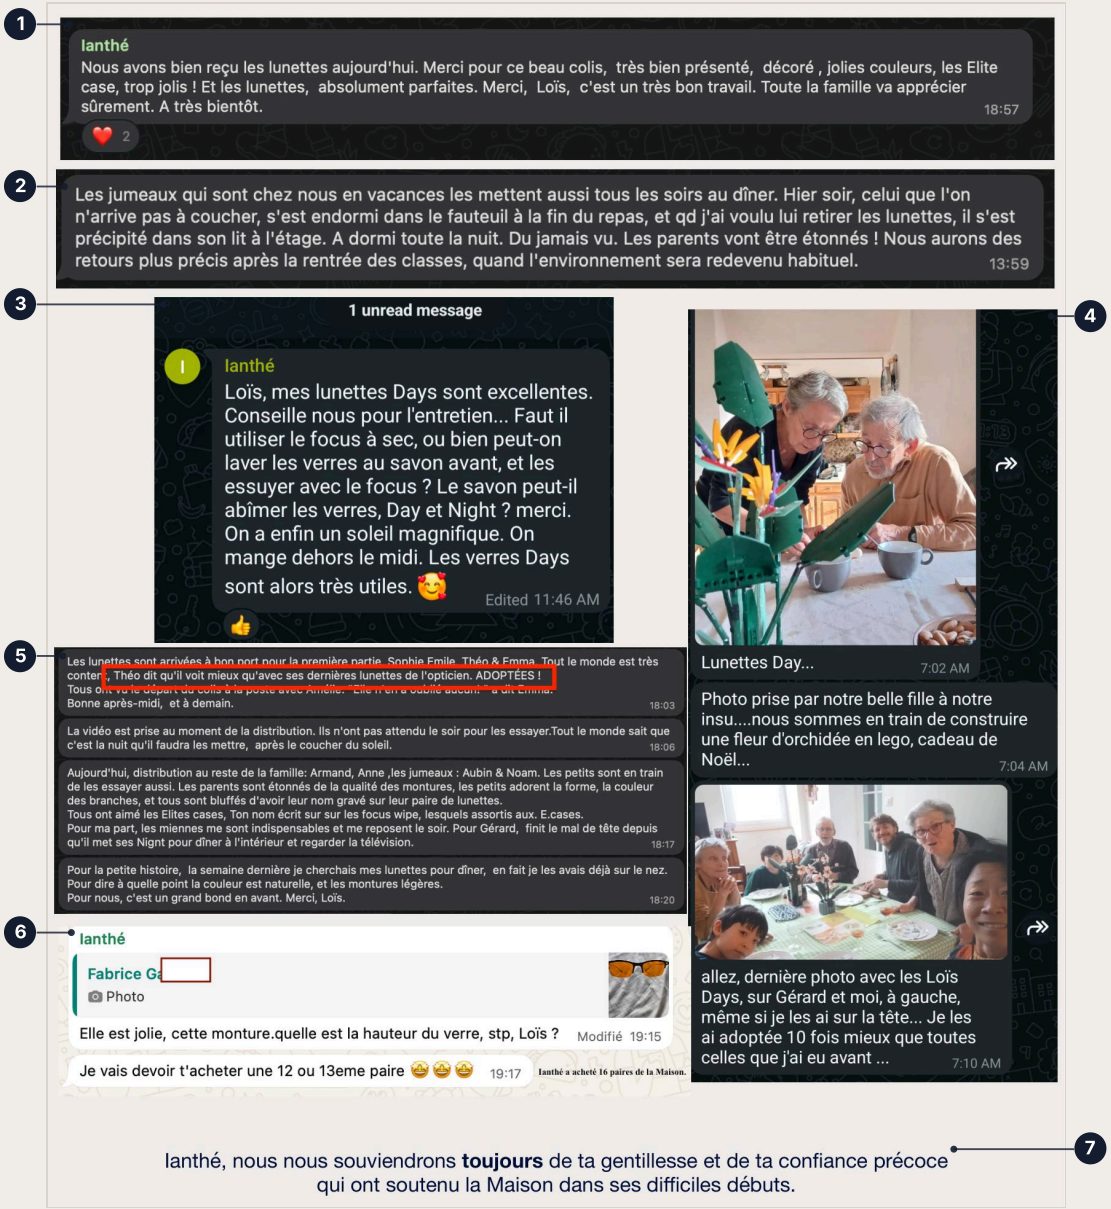

Funny story: last week I was looking for my glasses for dinner, and it turned out I already had them on my nose. Which shows how natural the color is, and how light the frames are.

For us, it's a big leap forward. Thank you, Loïs.

Hello Loïs,

I just received my night Pro glasses, I was able to test them yesterday for the first time, and despite spending a whole evening in front of a screen, I was able to fall asleep with startling ease. I lost count of how many times I felt like yawning, starting about 30 minutes after I put them on. I can't wait to see how it goes from here!

I'd like to get another pair, with Night lenses, and I wanted to ask you to confirm: it's no longer possible to use influencer promo codes?

I also wanted to ask you again which product you recommend for cleaning the glasses. You told me ideally isopropyl alcohol, if I remember correctly? Is 90% alcohol also OK?

Have a good rest of your day

3 Instagram story replies · loiskedochim · 58m

Fell asleep with them on!!

Quoted story I shower with them too, but it's on purpose 🤣 I put them on my head just long enough to soap up my face 😅

Quoted story Titanium doesn't rust.

I went to bed with them on and didn't even realize it at the time

They're so comfortable too 😂

Apparently I'm not the only one!

Since then I get sleepy at 9:30 p.m. 😅

Shoutout to @loiskedochim, who really delivered with these glasses (and yes, you can also have your vision correction included!)

I ordered a pair for me and my partner and I have to say I'm blown away (this is my experience and may not reflect yours depending on your lifestyle). I've been wearing them for 2 months now, and from the first week I noticed an improvement in my sleep. My wake-up time (6:30 a.m.) has been the same ever since, and that's without an alarm. I'm very happy to have invested in this pair for the years to come

7 Instagram story reply

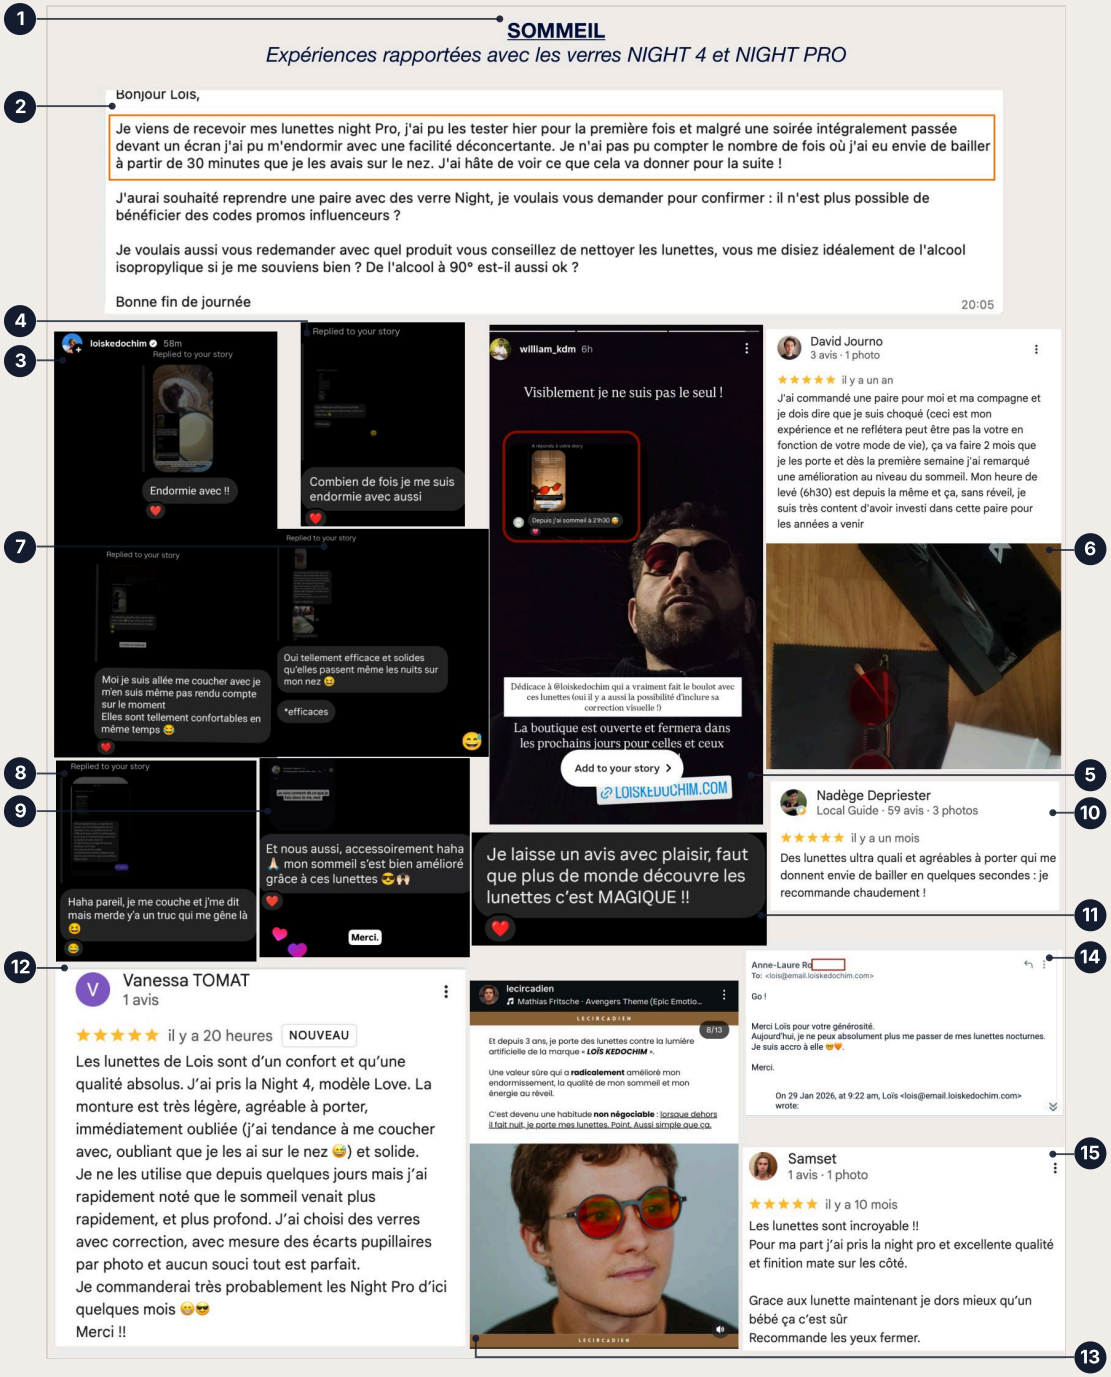

Quoted story I confirm, your frames are very beautiful and ultra sturdy. They don't fall off my nose, to the point that I even wear them when I go swimming in the sea. I couldn't do without the night ones anymore when I go out to stores or pass car headlights. LEDs are everywhere. Thank you, I hope you go far. TIME TO PERFORM

Quoted story I love my *DARONNE glasses :)

Yes, so effective and sturdy that they even spend the nights on my nose 😆

Quoted story Personally, I don't regret investing in your glasses at all, Loïs. The quality is there, and the effectiveness, plus I like your philosophy and what you embody, so for me, if I buy again, it'll be from you.

Usually I can't stand glasses on my nose.

Yours, I forget about them completely. Sometimes I turn off the light to go to sleep and I'm like, oops, the glasses.

Have a lovely evening

Quoted story Thank you

Haha same, I go to bed and I'm like, damn, something is bothering me here 😆

Quoted story Me, I'm happy with what I do in life.

And so are we, by the way, haha 🙏 my sleep has really improved thanks to these glasses 😎🙌

12 Google review · Vanessa TOMAT · 1 review · ★★★★★ · 20 hours ago · NEW

Loïs's glasses are absolutely comfortable and top quality. I got the Night 4, *LOVE model. The frame is very light, pleasant to wear, forgotten right away (I tend to go to bed with them on, forgetting I have them on my nose 😅) and sturdy.

I've only been using them for a few days, but I quickly noticed that sleep came faster, and deeper. I chose lenses with correction, with pupillary distance measured by photo, and no problem at all, everything is perfect.

I'll most likely order the Night Pro in a few months 😁😎

Thank you!!

And for 3 years now, I've been wearing glasses against artificial light from the brand “LOÏS KEDOCHIM”.

A sure bet that radically improved how I fall asleep, the quality of my sleep and my energy when I wake up.

It has become a non-negotiable habit: when it's dark outside, I wear my glasses. Period. As simple as that.

Bonjour Lois,

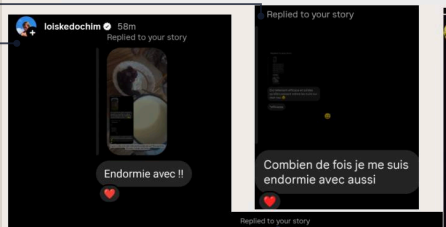

Je viens de recevoir mes lunettes night Pro, j'ai pu les tester hier pour la première fois et malgré une soirée intégralement passée devant un écran j'ai pu m'endormir avec une facilité déconcertante. Je n'ai pas pu compter le nombre de fois où j'ai eu envie de bailler à partir de 30 minutes que je les avais sur le nez. J'ai hâte de voir ce que cela va donner pour la suite !

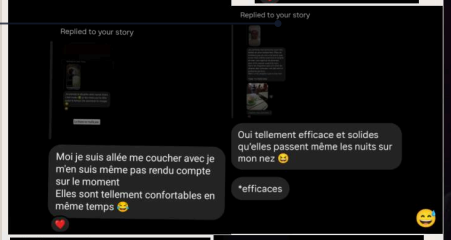

J'aurai souhaité reprendre une paire avec des verre Night, je voulais vous demander pour confirmer : il n'est plus possible de bénéficier des codes promos influenceurs ?

Je voulais aussi vous redemander avec quel produit vous conseillez de nettoyer les lunettes, vous me disiez idéalement de l'alcool isopropylique si je me souviens bien ? De l'alcool à 90° est-il aussi ok ?

Bonne fin de journée

I've been wearing Loïs's glasses since March and I have to admit it's a real game-changer.

Since then, I fall asleep in 5 min, I go right back to sleep after the slightest micro-awakening, and in the morning I really feel like I've had a good night.

To top it all off, this is also the first year my spring allergies haven't bothered me, and I think the glasses have something to do with it, notably thanks to the improvement in my sleep and my circadian rhythm.

I sincerely recommend them. Probably your best investment.

2 Instagram story · char_layers · 43s

Since March, I've been using @loiskedochim's glasses to protect myself from artificial light when the sun goes down, and I have to admit it's a real game-changer. Exposure to artificial light in the evening (LEDs, streetlights, screens...) disrupts our circadian rhythm and delays our secretion of melatonin, the hormone that promotes falling asleep.

Since I started using them, I fall asleep in 5 min and I'm able to go right back to sleep after a micro-awakening + other benefits that I'm ready to share with you if you're curious - they can also be adapted to your eyesight if you need vision correction.

You can guess that because of this, I rule out any nighttime retouching

3 Instagram DM · customer

Aaah ok, thanks so much!! I'm going to read that right away

I also wanted to tell you that it's been 2 weeks since I got my glasses and it's a real game changer!! my nights are much better and it changes everything

On top of that, I've also adjusted my schedule to the circadian rhythm, and exposing myself to natural light is the first thing I do when I wake up

and usually at this time of year I have huge allergy attacks every year (I still had some 2 weeks ago) and now I haven't had any for two weeks, I even go into the forest in nice weather and I don't suffer from anything, it's really incredible, because it has ruined so many springs for me!...

I don't know if it's related but since my hormonal balance has been changed, I think it is! anyway I'm so happy, thank you so much for everything you share

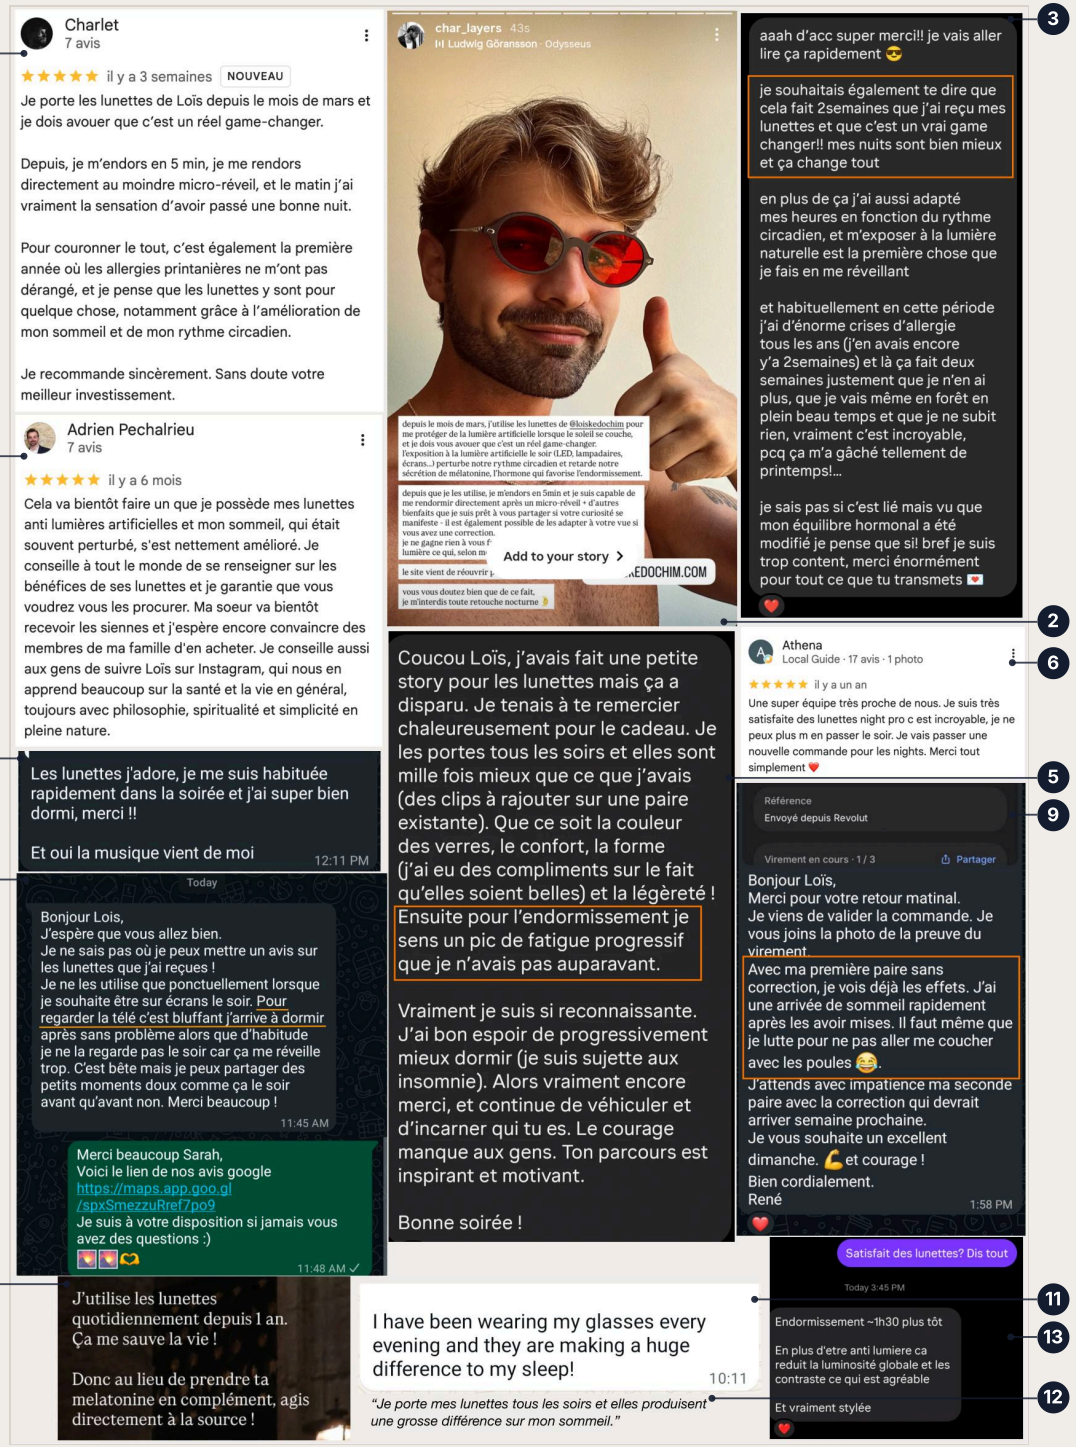

4 Google review · Adrien Pechalrieu · 7 reviews · ★★★★★ · 6 months ago

It will soon be a year since I got my artificial-light-blocking glasses, and my sleep, which used to be often disturbed, has clearly improved. I recommend that everyone find out about the benefits of these glasses, and I guarantee you'll want to get a pair. My sister will soon receive hers and I'm still hoping to convince some members of my family to buy some. I also recommend following Loïs on Instagram; he teaches us a lot about health and life in general, always with philosophy, spirituality and simplicity out in nature.

Hey Loïs, I made a little story about the glasses but it disappeared. I wanted to thank you warmly for the gift. I wear them every evening and they're a thousand times better than what I had (clip-ons to add onto an existing pair). Whether it's the color of the lenses, the comfort, the shape (I got compliments on how nice they look) and the lightness!

Then, for falling asleep, I feel a wave of tiredness that builds gradually, which I didn't have before.

Customer Hello Loïs,

I hope you're doing well.

I don't know where I can leave a review about the glasses I received!

I only use them occasionally, when I want to be on screens in the evening. For watching TV it's amazing, I can fall asleep afterward with no problem, whereas I usually don't watch it in the evening because it wakes me up too much. It's silly, but I can share cozy little moments like this in the evening, which I couldn't before. Thank you so much!

Hello Loïs,

Thank you for your reply this morning.

I just confirmed the order. I'm attaching the photo of the proof of transfer.

With my first pair without correction, I can already see the effects. Sleep comes quickly after I put them on. I even have to fight to keep from going to bed with the chickens 😂.

I can't wait for my second pair, with correction, which should arrive next week.

I wish you an excellent Sunday. 💪 and keep going!

Kind regards.

I've been following you for a while. I apply the teachings you share, not all of them of course since I live in the city, but it's coming along... and I see the benefits every day! I came across you by chance through a post, and I'm grateful for it. Keep going too :)

Loïs's glasses are incredible. First of all, you can't even feel them on your nose, they're so light, they're very pleasant to wear, but above all there's a feeling of comfort and well-being in the evening, an immediate rest for the eyes and the signal to the brain that it's time to slow down and get ready for sleep.

Careful, they make you yawn!

Sleep is also of much better quality, you wake up feeling great.

Impossible to do without them now :)

Hello,

My doctor advised me to buy your blue light glasses to improve my sleep...

5. Instagram story · dav.natur · 8m

The website of the best blue light glasses brand on the market closes tomorrow at 11 p.m. 🚨 (Sunday, March 22):

Just enter my name to support me along the way (dav.natur) 🤝

The most effective is the Night PRO lens, after that it's just a matter of design, depending on your taste.

Titanium frame, no screws (and I've worn glasses for 15 years, it's a game changer)

It's not the made-in-China plastic of other brands.

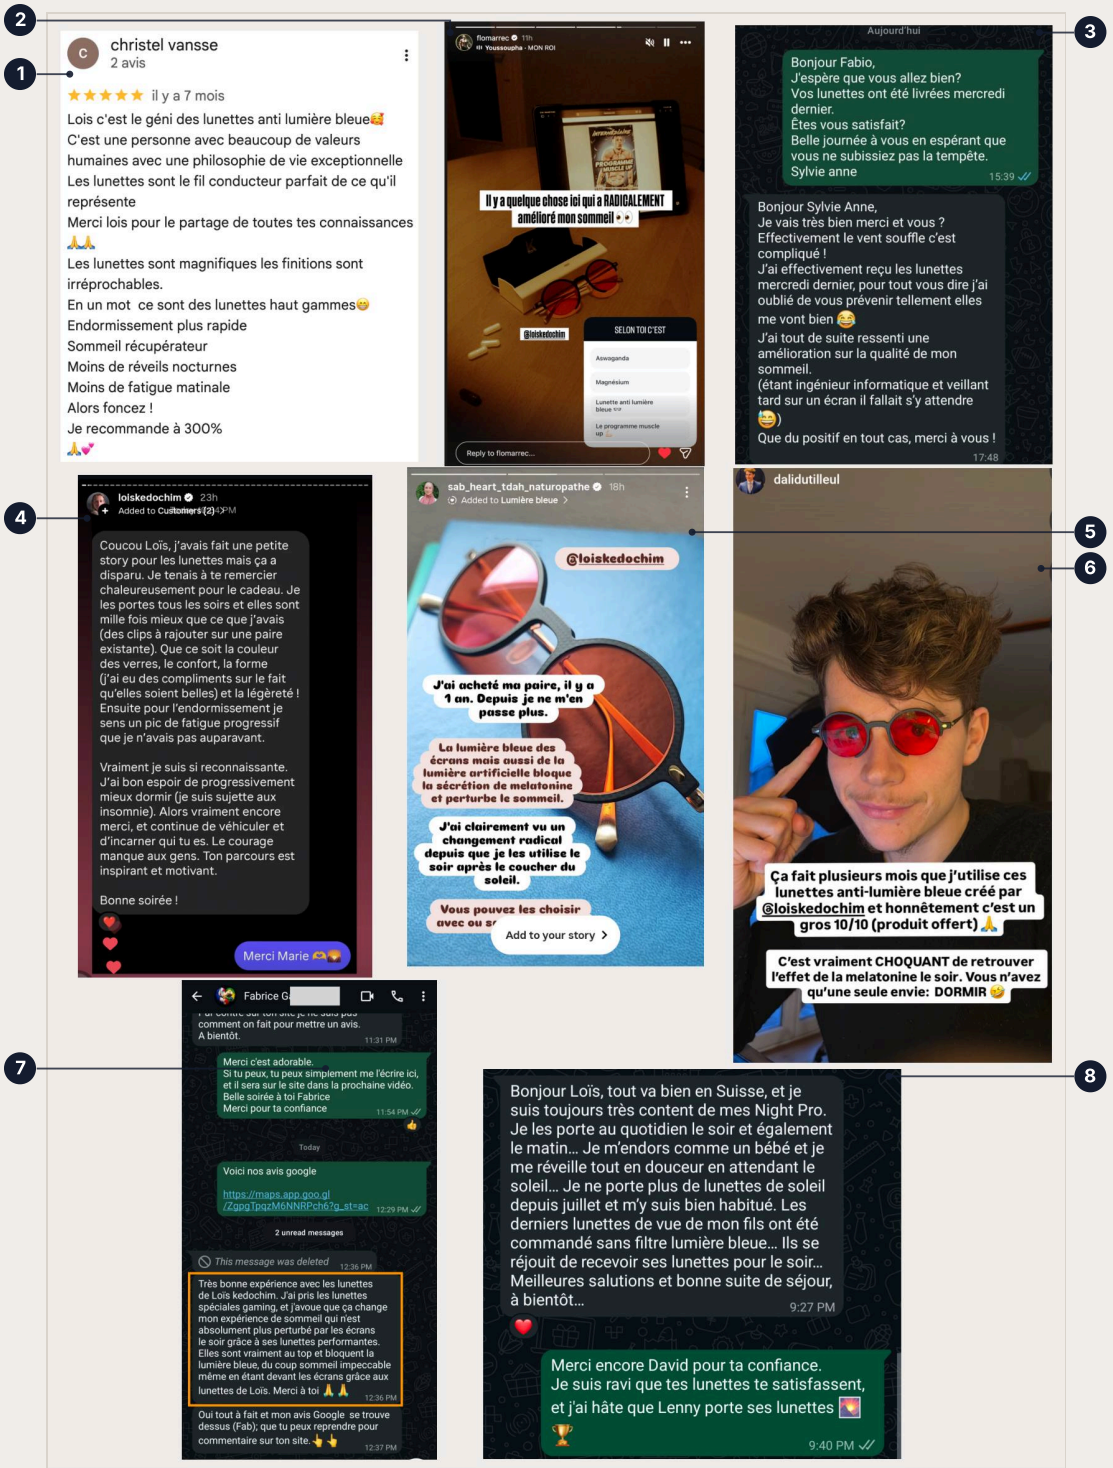

Blocks 99.99% of blue light across the spectrum (green included) 🔵🟢

I clearly felt the difference, I fall asleep much earlier despite my late use of screens for work

I bought my pair a year ago. Since then I can't do without them.

Blue light from screens, but also from artificial light, blocks melatonin secretion and disrupts sleep.

A huge thank you to Loïs Kedochim for this exceptional piece (Night 4). The frames are gorgeous, but what matters most is elsewhere: it's a true investment in your health. These glasses act as a shield against the toxicity of artificial light, which is taking over everywhere.

A rare and successful marriage of high-end handcrafted eyewear and health. A must-have!

From the very first use you feel soothed, I can finally open my eyes at night and no longer suffer from artificial lights, in front of a screen, a bulb, a phone... I recommend it 100%, the quality, the lenses and the follow-up, the team...

Glasses that rest the eyes, that let you fall asleep very easily.

I love them, they help me put up with artificial light. Thank you, Loïs, for everything you do. A deeply human person, which doesn't hurt either.

My son-in-law and I can't do without your glasses anymore! So now my husband is asking for his pair, so we're placing another order. 😉😊

Personally, my little routine is a walk in the evening to disconnect from screens, even if just for a moment. I have my creative period in the evening (music composition on a computer), so I have to adapt, and I bought blue light glasses from @loiskedochim a little over a year ago and it's a real game changer for me, since I spend quite a lot of time on screens in the evening. I notice a huge difference, I feel way less "nervous," my sleep settles in despite the screen exposure. Then breathing at times (heart coherence for me). As for supplements, I take magnesium at...

Shared story Since I started doing this, it's changed my life. Even when it rains, the people around me are down, and I'm in good spirits because first thing in the morning I expose myself to the light.

And it changes everything. ☀️🌧️🌍

So a big thank you, Loïs, and also to the circadia account that made me discover the impact of all this. And your glasses change everything too, I wear them morning and evening, before and after sunset. ☀️

Merry Christmas and have a lovely day, Loïs 🙂

Loïs's story text *I've lost count of the messages like this, lovely and full of new strength. When guys (rarely) tell me "you've changed, you're putting it all out there on social media," I know they're closing their eyes to messages like these, which I can't even keep track of and show, there are so many. Thank you all, and let's make every day a masterpiece, because everything in our nature is built to make them so.*

Customer I can vouch for your glasses since I started wearing them regularly. Just like that person says, I feel so much less depressed, sad and tired, I'm asleep within two minutes. I've added to my new routine getting light exposure first thing in the morning, we'll see how that goes. Thank you ☺️

A while back, I was looking for blue light glasses, thinking that you mainly had to protect yourself during the day and only in front of screens.

When I discovered Loïs's brand, I above all discovered a different vision of health, a more holistic, more coherent one. And that's what spoke to me first.

So I tested the glasses and honestly I don't regret it. From the very first time I felt real relief in my eyes, an overall calm, and I fall asleep much more easily and quickly.

> Since I sometimes have anxiety attacks in the evening, I also notice that it helps me calm down.

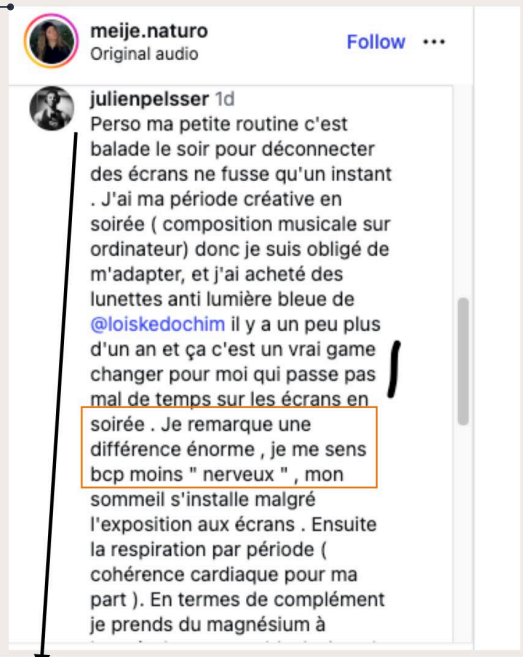

And a detail that matters 😅: they're sturdy. I've already dropped them (even crushed them...), and they still hold up.

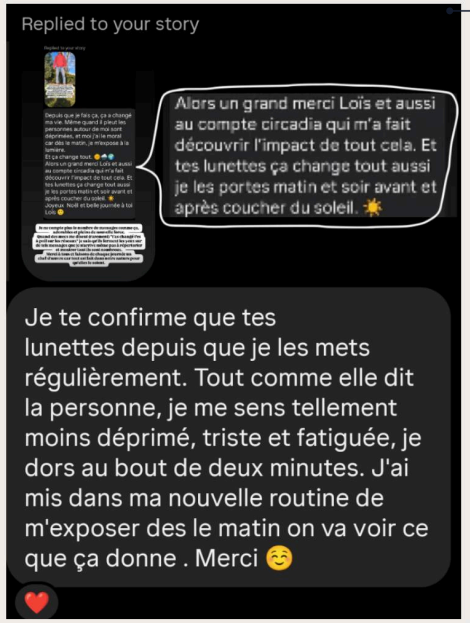

Simple, but effective. It makes a real difference for me!

Je porte des lunettes " Night " depuis bientôt un an , je ressent une vraie différence ! Je passe régulièrement du temps sur écran en soirée pour bosser et c'est un vrai confort visuel que je découvre, en plus je m'endors vraiment plus facilement depuis que je porte les lunettes , moins d'irritabilité. Impossible de m'en passer . En dehors du produit, Loïs est une personne passionnée qui partage et sensibilise énormément via son contenu de qualité sur les réseaux sociaux. C'est une personne entière sans filtre (à l'instar de ces lunettes 😅) , qqun à suivre pour ceux qui veulent s'éduquer sur la lumière naturelle en particulier, et la santé holistique d'une manière plus générale ! Je recommande la personne et les produits à 100% ! 🙏

Il y a longtemps, je cherchais des lunettes anti lumière bleue en pensant qu'il fallait surtout se protéger en journée et uniquement devant les écrans.
En découvrant la marque de Loïs, j'ai surtout découvert une autre vision de la santé, plus globale, plus cohérente. Et c'est ça qui m'a parlé en premier.
Du coup j'ai testé ses lunettes et honnêtement je ne regrette pas. Dès la première fois j'ai senti un vrai soulagement au niveau des yeux, un apaisement général, et je m'endors beaucoup plus facilement et rapidement.
Ayant parfois des crises d'angoisse le soir, je remarque aussi que ça m'aide à me calmer.
Et détail qui compte 😅 : elles sont solides. Je les ai déjà fait tomber (voire écraser...), et elles tiennent toujours.
Simple, mais efficace. Ça fait une vraie différence pour moi !

I've been wearing "Night" glasses for almost a year now, I feel a real difference! I regularly spend time on screens in the evening to work and it's real visual comfort that I'm discovering, plus I fall asleep a lot more easily since I started wearing the glasses, less irritability. Can't do without them. Beyond the product, Loïs is a passionate person who shares a lot and does a great deal to raise awareness through quality content on social media. A genuine, unfiltered person (just like these glasses 😅), someone to follow for anyone who wants to learn about natural light in particular, and holistic health more generally! I recommend the person and the products 100%! 🙏

Glasses of very high quality.
I've noticed huge improvements in my sleep and my fatigue:
I used to wake up regularly at night and often had trouble getting back to sleep; with the glasses I've gotten quality sleep back, with almost no more nighttime awakenings, and when it does happen, I fall back asleep very easily. I also have a lot more energy, whereas I used to feel constantly tired.
I'm very happy with these glasses, which I highly recommend.
I also had a very good experience dealing with the team.
Thank you

• I fall asleep more quickly
• my eyes are rested 😌

Dès la première utilisation, ce fut un véritable « Waouh ». Ce « waouh » comparable à celui ressenti devant un coucher de soleil flamboyant, un moment suspendu où tout semble s'apaiser. Voilà exactement ce que ces lunettes offrent : une parenthèse de détente, douce et réconfortante.

Au-delà de leur promesse esthétique, leur efficacité est bluffante. En à peine vingt minutes, elles ont réussi à apaiser une migraine persistante qui refusait de céder. Depuis, elles sont devenues mes alliées fidèles dès la tombée de la nuit. J'ai pris l'habitude de les porter chaque soir, et je ne saurais désormais m'en passer.

Elles sont une promesse de bien-être, un instant de répit dans nos vies numériques, un coucher de soleil quotidien pour nos yeux fatigués.

Indispensables et envoûtantes !

From the very first use, it was a true "Wow." That "wow" was comparable to the one you feel in front of a blazing sunset, a suspended moment when everything seems to calm down. That's exactly what these glasses offer: a soft, comforting moment of relaxation.

Beyond their aesthetic promise, their effectiveness is stunning. In barely twenty minutes, they managed to soothe a persistent migraine that wouldn't let up. Since then, they've become my faithful allies from nightfall on. I've gotten into the habit of wearing them every evening, and I couldn't do without them now.

They are a promise of well-being, a moment of respite in our digital lives, a daily sunset for our tired eyes.

Essential and bewitching!

As a reader who sometimes reads veeery late 🤭 my eyes and head hurt a lot less, and my sleep is much more restful since I started wearing the blue light glasses from @loiskedochim

The only glasses that truly block blue light, and I swear it's so restorative!! At the next sale I'm buying some for the whole family 😅

Loïs Watch out, there are other glasses in the world that block artificial blue light. But not with the same values, not with the same awareness of daylight, not with the same product.

Good evening Loïs!

I hope you're doing well!

Well, we first got in touch in October... Then I bought your glasses in December...

I was suffering from terrible migraines at the time (family history) and I was resigned to living with them for the rest of my life, since they'd first appeared 26 years ago.

Since I stopped wearing my “rest” glasses, nothing. Since October, not a single migraine!!!

My partner, who is nearsighted and astigmatic, used to wear either his prescription glasses with a blue light filter or his contact lenses. Seeing the effects on me and the info I was sharing, he tried them. No more headaches for him either! He only wears his glasses for ten minutes at night to get back home (and sees the harm very quickly)

Now I'm going to take care of my daughter's eyes. I'd told myself she'd have laser surgery later (maybe if she felt like it). She has strabismus and I think she's astigmatic too. She's ten and has been wearing blue light glasses for seven years now. I'm going to try to get her to wear them less and to get even more exposure to the light of the...

3 *Wearing so-called “rest” glasses chronically during the day has serious consequences, because they cut your nervous system off from the sun, through the eyes.*

Hello Loïs,

J'espère que tu vas bien.

Je souhaitais t'écrire pour te faire un point au bout de + d'1 mois d'utilisation des lunettes. Chose faite à Noah hier

C'est vraiment fou. On parle souvent de l'entraînement invisible dans le sport de haut niveau, et le fait d'utiliser cela, ça me permet de gagner un temps fou dans ma récupération et la capacité à réitérer les grosses journées d'entraînement 💪

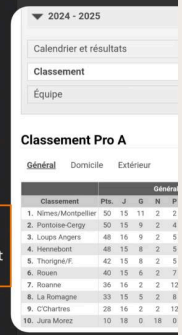

En + de cela, ça me permet de ne plus galerer le matin à me réveiller. Je me réveille naturellement + tôt et avec une bonne forme.

J'utilise Whoop depuis quelques mois pour traquer mes charges d'entraînement et mon sommeil. Depuis que je porte les lunettes, mon sommeil est quasi tout le temps dans le vert.

Merci de m'avoir contacté et de m'avoir initié à ce « petit » (grand) geste

Au plaisir

Hello Loïs,

Thank you for your reply, which cleared things up for me.

Second evening yesterday, and it's really surprising what effect it has. I wanted to test a video game session in the evening to see whether the stimulating side of the game had more impact on falling asleep than the light.

Despite a fast-paced game, I was in a state of extreme relaxation throughout the whole session (about 2 hours), and I was able to fall asleep right afterward, whereas normally I have to turn off screens for 2 to 3 hours before going to bed to be sure I can fall asleep under the same conditions.

For screen use, it's just perfect.

On the other hand, I understand why you suggested starting with classic night lenses. When I cooked in particular, I had quite a hard time seeing what I was doing, I had to look over the top of the lenses to see how far along the cooking of my meat was. With the classic Night ones, do you think this problem will be gone?

Loïs Hello again, absolutely, with NIGHT 4, no problem at all for all these activities (cooking, restaurants, nights out with friends, etc.). I do invite you to read our terms and conditions, though, because the NIGHT lens still reduces alertness.

Customer Thanks, that's reassuring, it matches what I was thinking.

I see that you offer a frame in...

Hello Loïs, I hope you and your loved ones are doing well

I'm so happy, I just let my son pick a pair of glasses from your brand for Christmas

He's the one who used to make fun of me for the glasses I've now been wearing for 9 months 😂 every night

He chose *La ELEMENT in night 4 🥰🙏🎁

For a teenage gamer, I'm so happy!!!

Patience pays!!

Such a beautiful and useful Christmas gift

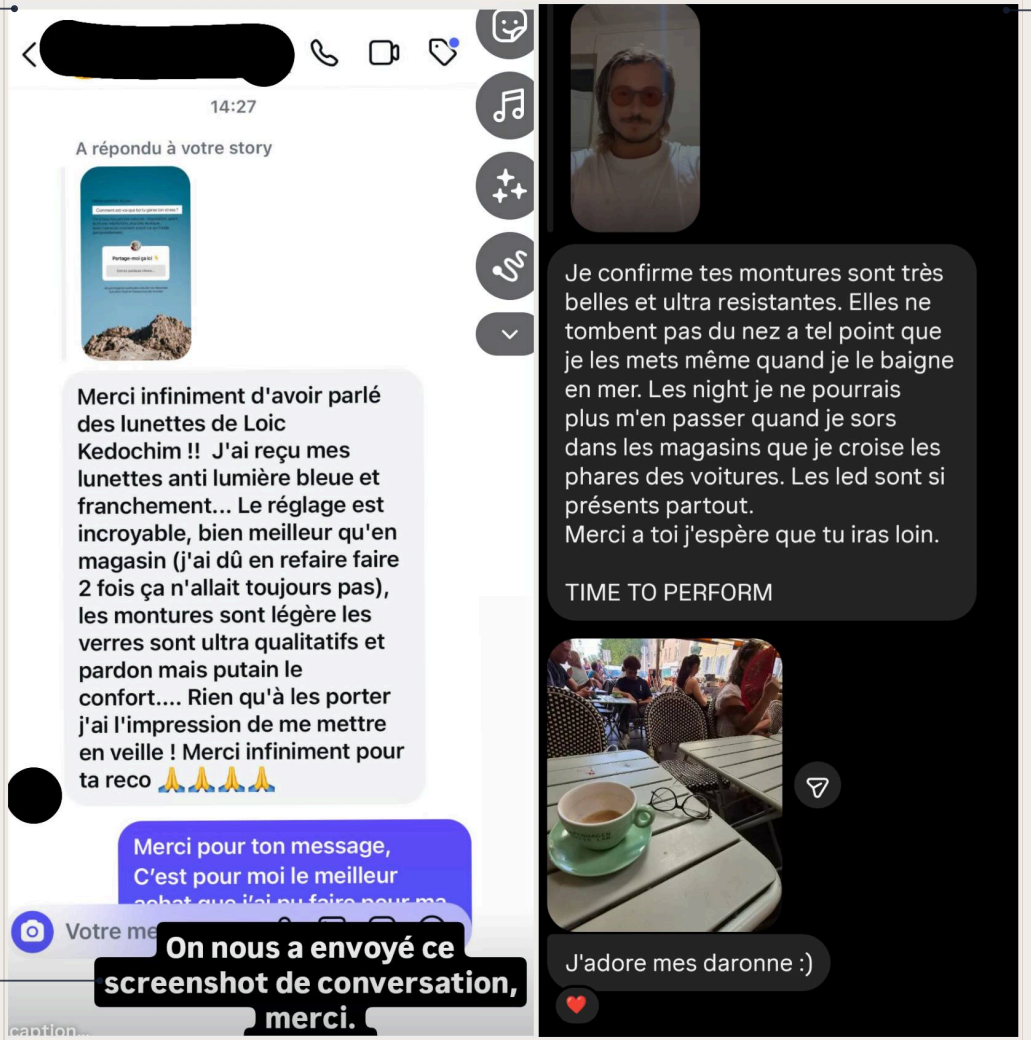

Have a good evening

Loïs That's awesome!! Thank you for your trust.

Perfect choice, Night 4 for gaming :)

Customer Thank you so much for talking about Loic Kedochim's glasses!! I received my blue light glasses and honestly... The fit is incredible, much better than in a store (I had to have them redone twice, they still weren't right), the frames are light, the lenses are ultra high quality and sorry, but damn, the comfort.... Just putting them on feels like I'm putting myself on standby! Thank you so much for the recommendation 🙏🙏🙏🙏

Other person Yo [name hidden], I have to give you some feedback haha, I'll tell you right away: you were right

I didn't have the money to buy on Loïs's website (€180 or so) and I found the brand circadie from [name hidden] (€95)

But I really regret it now!

There were fake reviews on the website: it said 217 5-star reviews but it was impossible to see those reviews. Impossible to get package tracking, and communication with the brand was almost impossible.

In the end I did get them, but they're nothing amazing, and on top of that they're too small for my head

I'm so bummed

(it's not the guy who was annoying me last time, he's a really nice guy and his testimonial is worth its weight in gold haha [name hidden] chose the path of dishonesty)

Loïs Cheap ends up costing you.

Loïs Excellent, thanks for the testimonial, my friend

Customer Personally, I don't regret investing in your glasses at all, Loïs. The quality is there, and the effectiveness, plus I like your philosophy and what you embody, so for me, if I buy again, it'll be from you.

Usually I can't stand glasses on my nose.

Yours, I forget about them completely. Sometimes I turn off the light to go to sleep and I'm like, oops, the glasses.

Have a lovely evening

Loïs 🫶 Thank you

I started wearing Night Pro glasses just a few days ago, and for now I'm getting used to some changes :)

But what stands out right away is the high quality and lightness of the glasses! I plan to order another pair, but this time a daytime one!

Customer I've always hated wearing glasses. Reading this testimonial, I realize I wear your frames with no problem: it's simple, they're so light and comfortable that I forget about them. I don't even have the presence of mind to tell myself “how comfortable” since the glasses just make you forget them 🤣

I appreciate that they don't move, and that there's no unpleasant plastic or metal against my skin.

It's excellence, bravo.

They're prescription (I'm nearsighted)
Do you still have all the data so we can remake the same pair I had made (and if the same model isn't available, no problem, we'll take another one)
Thanks a thousand times...

Customer I know your glasses are excellent, if not exceptional, and I'm so eager to have them even though I hate wearing glasses. The ones I currently have are MINIMA in beta-titanium wire, very light, but with a cellulose acetate front and totally lousy ZEISS lenses. So nothing like the ones you offer in carbon, with top-notch lenses, as I was able to see in the videos on your YouTube channel, where I learned a lot. It's also your state of mind and your philosophy of life, I'd say your personality, that led me to consider your Brand. But to get back to my order, I just hope I don't mess up, especially since there are 2 pairs involved. I've always been reluctant to buy glasses online, mainly because there's no way to know whether the design and size will suit your face. I took the plunge anyway, for the reasons mentioned above. Sorry for what you might have perceived as interference or a lack of trust.
Thank you Loïs
Loïs Thank you so much Michel, it really touches me. You can be sure your glasses will suit you wonderfully and they'll never leave you again.
If, heaven forbid, there were the slightest centering error (which doesn't happen to us), we would do whatever it takes to satisfy you, at our own expense.

   Fabienne Which brand are the glasses?

   Loïs Kedochim, it's the night ones.

   The guy only opens his sales a few times a year, you have to get on the waiting list and then you'll be in a WhatsApp group where they announce the sales (also by email), and it only lasts 15 days.

   I missed the first sale because I couldn't find my eye doctor's prescription anymore, but I found it and I didn't miss the 2nd sale. Bought my prescription glasses plus the night ones, which are without correction.

   Something I haven't shared yet:

   I've been using these orange evening glasses from @loiskedochim for 3 months now

   I got them in my prescription (nearsighted and astigmatic) to help me take my contacts out earlier in the evening.

   Well, right now I'm hanging out outside late in sunset mode, but as soon as I get home I put them on and it's a huge relief.

   I haven't changed the evening lights in my new apartment yet, so I really need these glasses in the evening.

We're blown away by the quality of the Night lenses. The brightness is very cheerful. As for the correction, the result is better than the recent pair from our conventional optician for Gérard. We're sure the health benefits will be there, because they'll be worn. The whole family is equipped. And will continue to be. We're so lucky to have found you. Thank you, Loïs, for your work. See you soon.

I'm really looking forward to receiving the glasses!

By the way, I'd also like to buy a pair of prescription glasses from you, but I no longer have my prescription. Can I simply send you the correction for each lens?

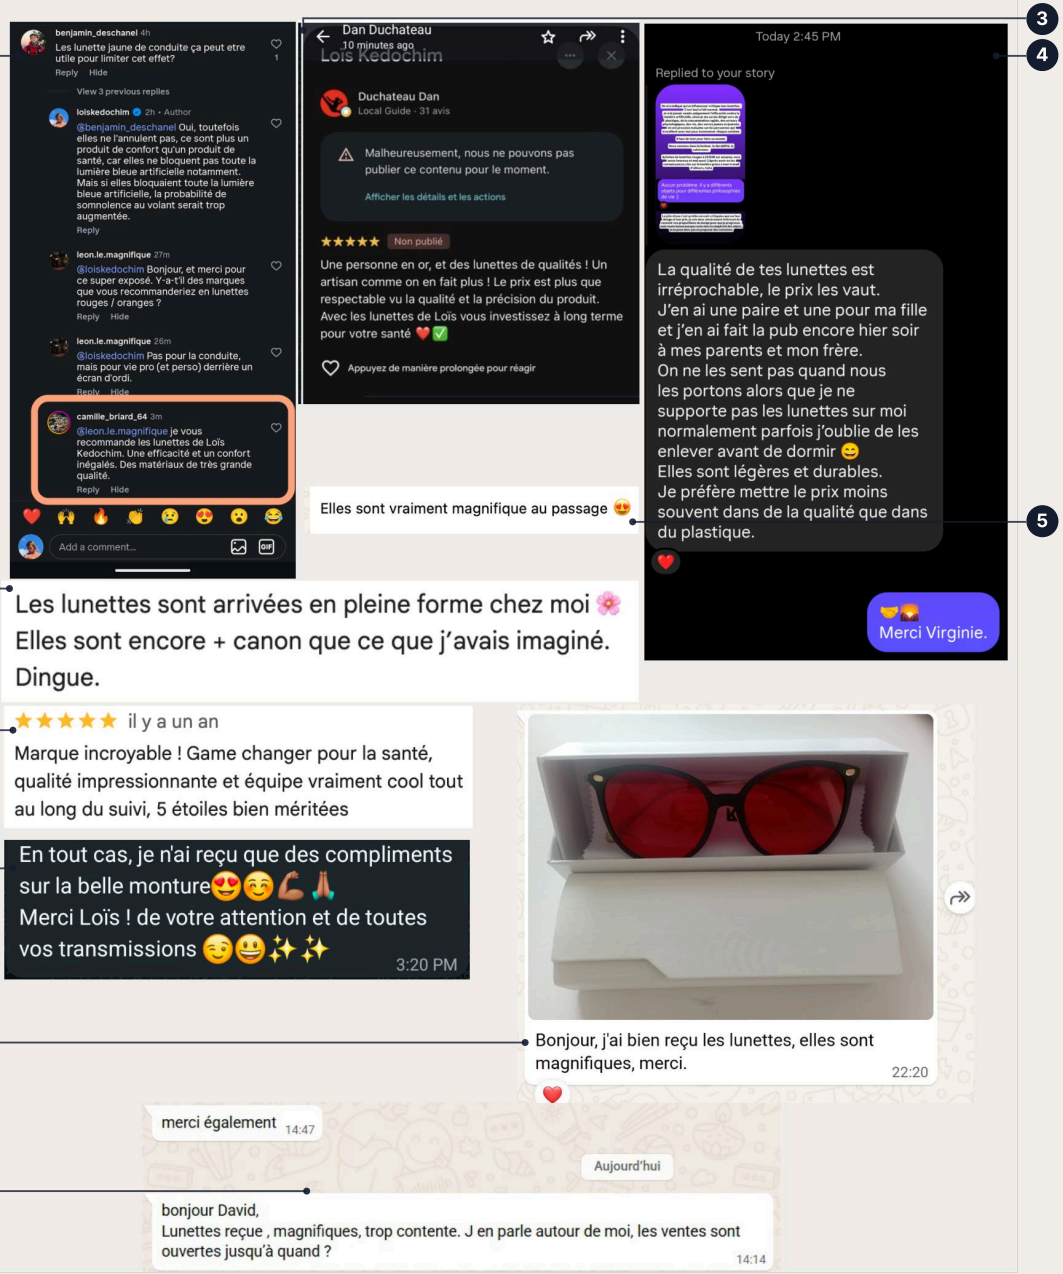

A big thank you for everything you share, I love your work and I'm very eager to tell my clients about it too.

benjamin_deschanel Could yellow driving glasses help limit this effect?

loiskedochim @benjamin_deschanel Yes, but they don't cancel it out. They're more a comfort product than a health product, because they don't block all artificial blue light, among other things. But if they blocked all artificial blue light, the likelihood of drowsiness at the wheel would be too high.

leon.le.magnifique @loiskedochim Hello, and thank you for this great explanation. Are there any brands you'd recommend for red / orange glasses?

leon.le.magnifique @loiskedochim Not for driving, but for work (and personal) use in front of a computer screen.

camille_briard_64 @leon.le.magnifique I recommend the glasses from Loïs Kedochim. Unmatched effectiveness and comfort. Very high-quality materials.

Loïs's story *I was told that an influencer is criticizing my glasses. That's perfectly normal.*

I never sold only effectiveness against artificial light, otherwise I'd have gone toward plastic, fast consumption, physiological mistakes, screws, yellow lenses during the day, and unhealthy pressure on the people who work with me to save every last cent.

It takes all kinds to make a world.

We are about slowness, durability, consistency.

Buy red glasses for €20 on Amazon, you'll be happy and so will I :) After gaining the key knowledge about light thanks to my work, by the way, haha

Loïs, in the story No problem. There are different objects for different philosophies of life :)

The nice thing is that they're only criticized for their design and their price, so I'm sincerely interested in receiving your design proposals so I can improve. But any good brand keeps its objects simple, so I can't offer hundreds of them.

Customer The quality of your glasses is flawless, the price is worth it.

I have a pair and one for my daughter, and I was promoting them again just last night to my parents and my brother.

You don't feel them when you wear them, even though I normally can't stand glasses on me. Sometimes I forget to take them off before going to sleep 😄

They're light and durable.

I'd rather pay for quality less often than keep paying for plastic.

Loïs 🤝🌄 Thank you Virginie.

I rarely leave reviews, but I wanted to this time. After trying several so-called blue light glasses, these are by far the best I've used. They're very effective in the evening and, even though they've been mishandled several times, forgotten in bed, crushed..., they've stayed in perfect condition. Truly remarkable quality. Loïs No, only wear them when the sky is dark. During the day, you need all the wavelengths the sun gives you (as soon as the sky has any light), and even in front of a screen, you absolutely need to take in these wavelengths.

COMPLÉMENTARITÉ DES VERRES NOCTURNES : NIGHT 4, NIGHT PRO, NIGHT DRIVE

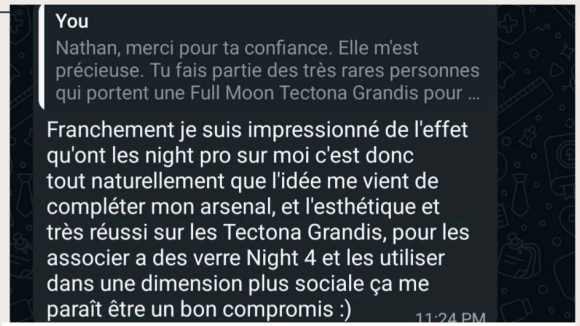

2

Pendant que des acteurs dans le domaine préféraient vendre verres anti-lumière bleue diurnes, éclairage électrique nocturne ou même diurne, et “photobiomodulation” artificielle, nous avons choisi d’étudier patiemment la diversité des situations lumineuses nocturnes d’un même individu, et d’y répondre adroitement, sans diversification excessive. Raison pour laquelle le verre NIGHT 4 est notre best-seller : il est le plus facilement adopté car il est le plus polyvalent tout en maintenant son efficacité intelligente sur la plus grosse partie du problème.

While some players in the field preferred to sell daytime blue-light-blocking lenses, nighttime or even daytime electric lighting, and artificial “photobiomodulation,” we chose to patiently study the variety of nighttime light situations a single person goes through, and to respond to them skillfully, without excessive diversification. That is why the NIGHT 4 lens is our best-seller: it is the most easily adopted because it is the most versatile, while staying smartly effective against most of the problem.

I have the Night Pro and the Night Drive, and honestly I couldn't do without them anymore. The Night Drive really changed my night drives: I no longer suffer through the big flashes of headlights that used to hurt behind my eyes and hammered me all the way to the back of my skull. The Night Pro have become a daily habit. So next time, I'll move on to the Night 4. Because it's important to vary the pair depending on how you want to use it! A really wonderful discovery that has been with me for several years!

Customer Great, thanks so much.
Where do I click on "I paid"?
Perfect then, I'd already seen that when I ordered the night drive.
And for driving at night, it's a real pleasure not to have the big white LED headlights in your eyes 👌
A treat for the eyes, so I can't wait to get the night ones!

Loïs Gorgeous my friend, I love clams.

Have you received your glasses? What do you think of them?

Customer What I think is that I can't wait to order another pair, for the night 🙌🏻.

I'm back from vacation at my family's, so I need time to let my brain settle before leaving a review 👊🏻. But honestly you can see there are still people capable of doing really good work 🙏

Anyway, I won't say more, it'll be a surprise. And I haven't forgotten the few designs I had in mind.

Loïs Hi Fanny, how are you?

You and Geoffrey, what do you think of your glasses with DAY Mineral lenses?

Have a lovely evening!

Fanny Hi Loïs, I'm doing well, thanks 👍

Very happy with the glasses, very sturdy (they've been dropped a couple of times), they don't scratch. I'm delighted with them personally. And Joffrey too.

Our NIGHT equivalents, which we're just as happy with, are currently stuck at a wedding venue that we left in early July and where we forgot a bag with our three pairs of night glasses. I've called the manager several times, he tells me he has to send them back but he doesn't... we're really bummed and it's a 3-hour drive from our place. I hope to see them again someday. Especially with night falling earlier these days.

And how are you?

Loïs Oh no, I really feel for you.

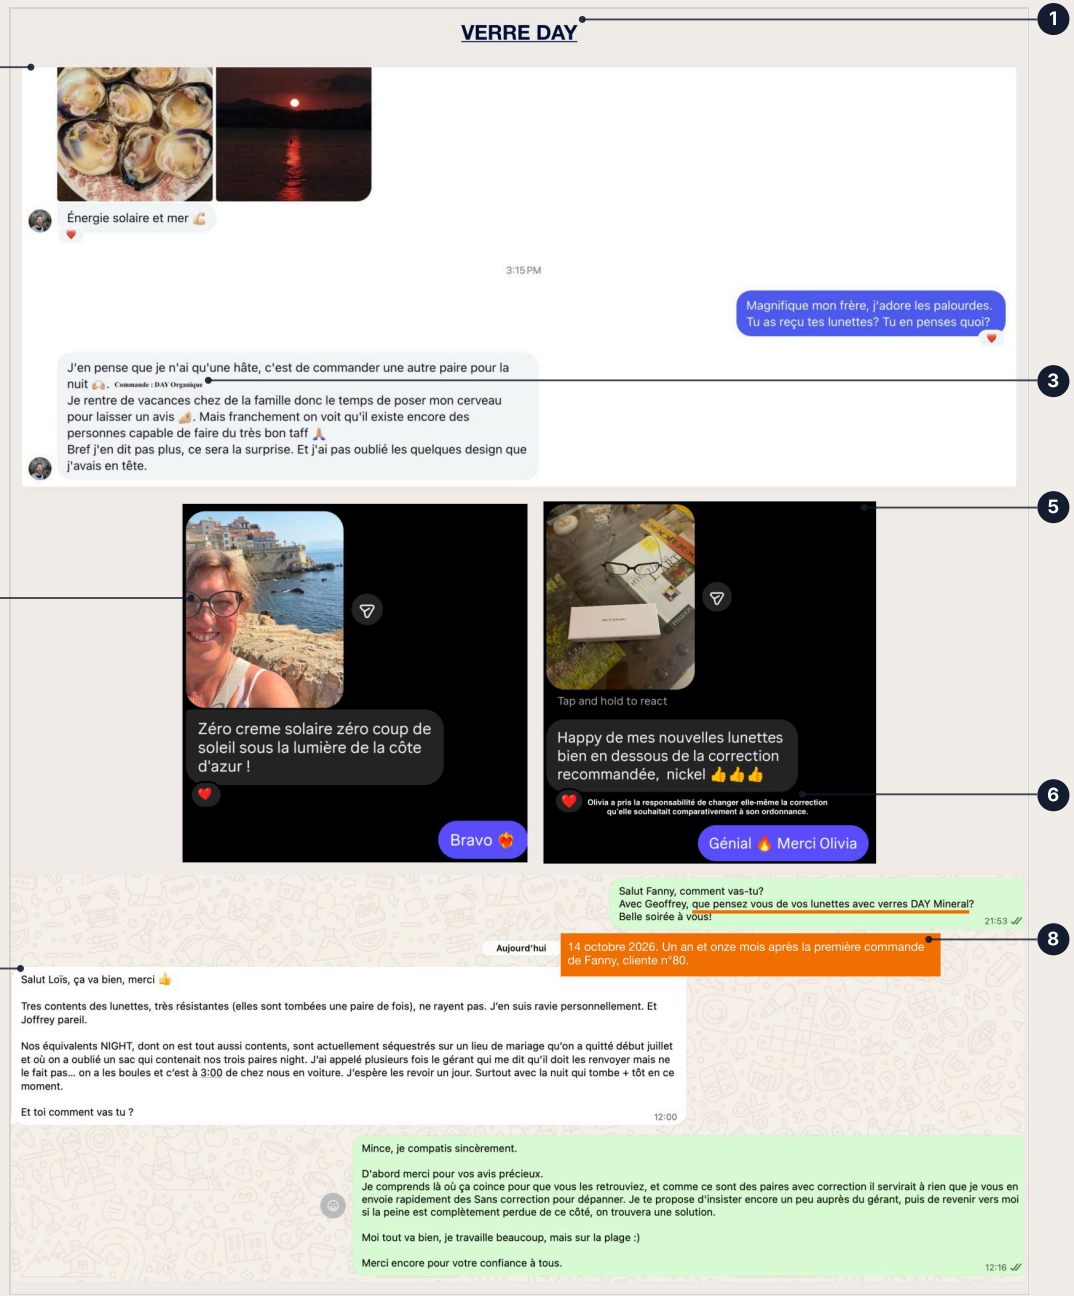

First of all, thank you for your valuable feedback.

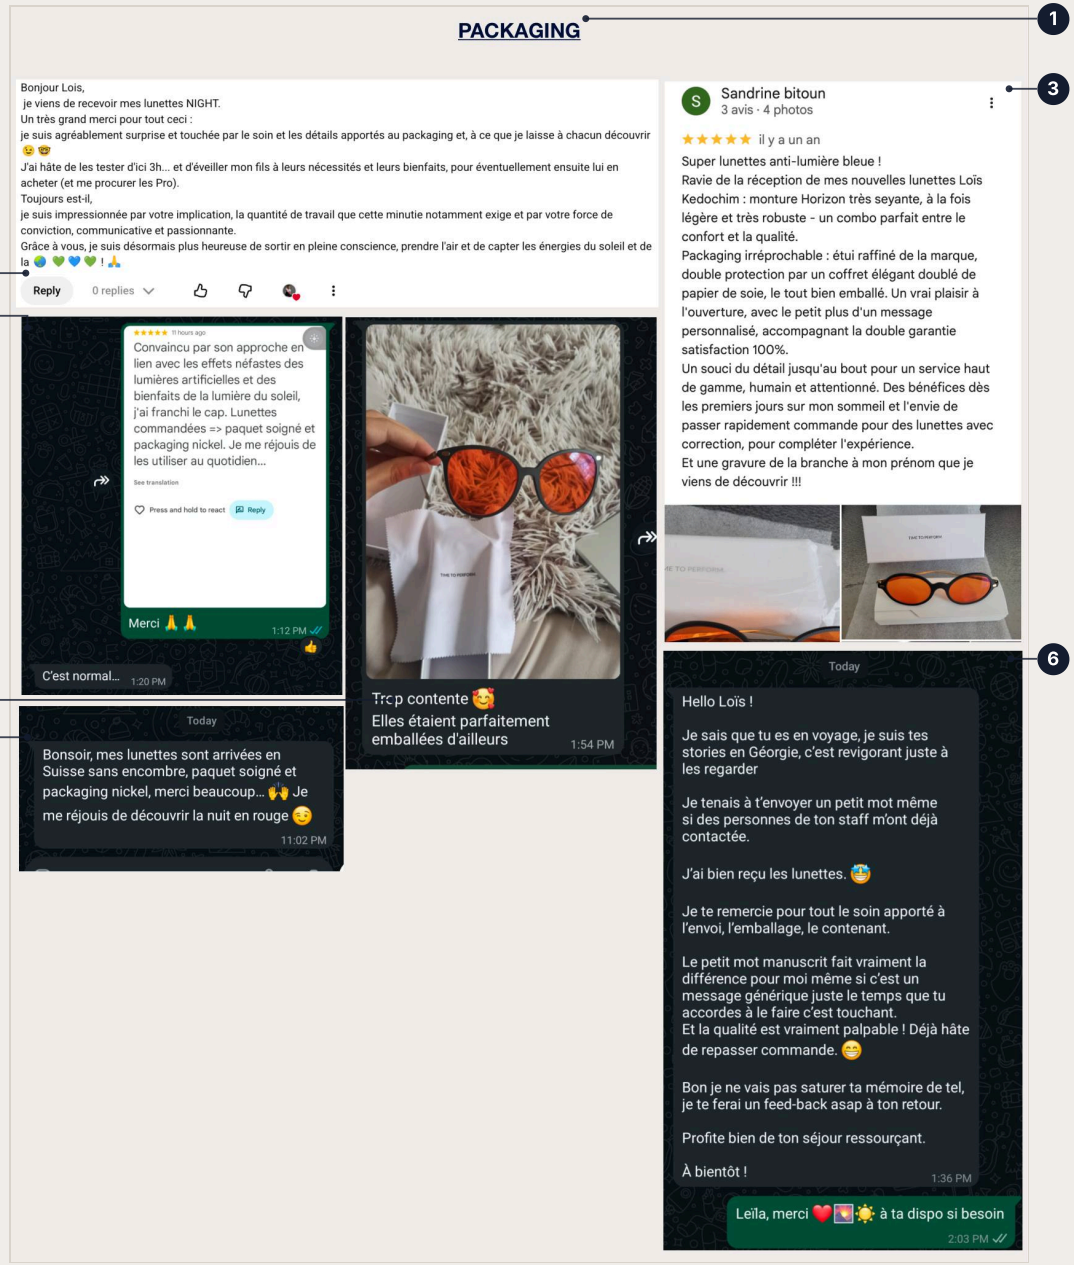

I understand where the hold-up is in getting them back, and since they're pairs with correction, there'd be no point in my quickly sending you pairs without correction as a stopgap. I suggest you push the manager a bit more, then come back to me if it's completely hopeless on that end, and we'll find a solution.

I'm doing well, I'm working a lot, but on the beach :)

Thanks again for your trust, to you both.

PACKAGING

2 YouTube comment · customer

Hello Loïs,

I just received my NIGHT glasses.

A huge thank you for all of this:

I'm pleasantly surprised and touched by the care and the details put into the packaging and by what I'll let everyone discover 😉🤓

I can't wait to try them out in about 3 hours... and to make my son aware of what they're for and what they bring, so that I can eventually buy him a pair (and get the Pro ones for myself).

Be that as it may,

I'm impressed by your commitment, by the amount of work that this kind of attention to detail requires, and by your force of conviction, which is contagious and passionate.

Thanks to you, I'm now happier to go outside mindfully, get some fresh air, and soak up the energy of the sun and of the 🌏💚💙💚! 🙏

Great blue light glasses!

Thrilled with the arrival of my new Loïs Kedochim glasses: the *HORIZON frame is very flattering, both lightweight and very sturdy, a perfect combo of comfort and quality.

Impeccable packaging: a refined case from the brand, double protection with an elegant box lined with tissue paper, everything well packed. A real pleasure to open, with the little extra of a personalized message that comes with the double 100% satisfaction guarantee.

Attention to detail all the way through, for a high-end, human and attentive service. Benefits for my sleep from the very first days, and a wish to quickly order glasses with vision correction, to complete the experience.

And an engraving of my first name on the temple, which I just discovered!!!

Subject Re: To those who stand by us.

Hi Loïs, On Emeline Bourroux's advice I bought my pair of night glasses this winter: I'm thrilled with them! Just yesterday I bought the drive ones. And I'm also planning to buy the night pro ones and a mineral lens for my daytime correction when I can afford it. So at least 2 more purchases planned! Haha + my family and friends to come, since I talk about them a lot: I love them! And also: I wore contact lenses from the moment I woke up until bedtime for 25 years. And now, for the past 8 months, I've been slowly transitioning to wearing glasses and getting away from contacts more and more. No comments on this excellent video and all this knowledge about the Loïs Kedochim brand, incredible.

Personally, I'm up to 2 pairs of glasses for the evening after sunset.

They're excellent in quality, they have to be the best on the market.

Too bad for those who don't know this brand.

If all manufacturers did the same thing as Loïs in terms of quality and respect for the customer, society would be doing much better by being more virtuous, bravo Loïs 🙏

One of the biggest table tennis legends wearing your glasses! How cool is that? 🔥
In February 2012, as a table tennis fan, I went to see Dimitrij Ovtcharov from Germany WIN the European Top 12 in Villeurbanne, France. He is one of few Europeans who have managed to challenge and beat the Chinese in this sport. I got his autograph on a raquet you'll see on next story. He is a complete athlete, but his service and his backhand are fire - I remember every video, and we tried to imitate him in the club.
Today, Dimitrij is aware of the impact of artificial night light on our lives, and he wears the glasses from our brand.

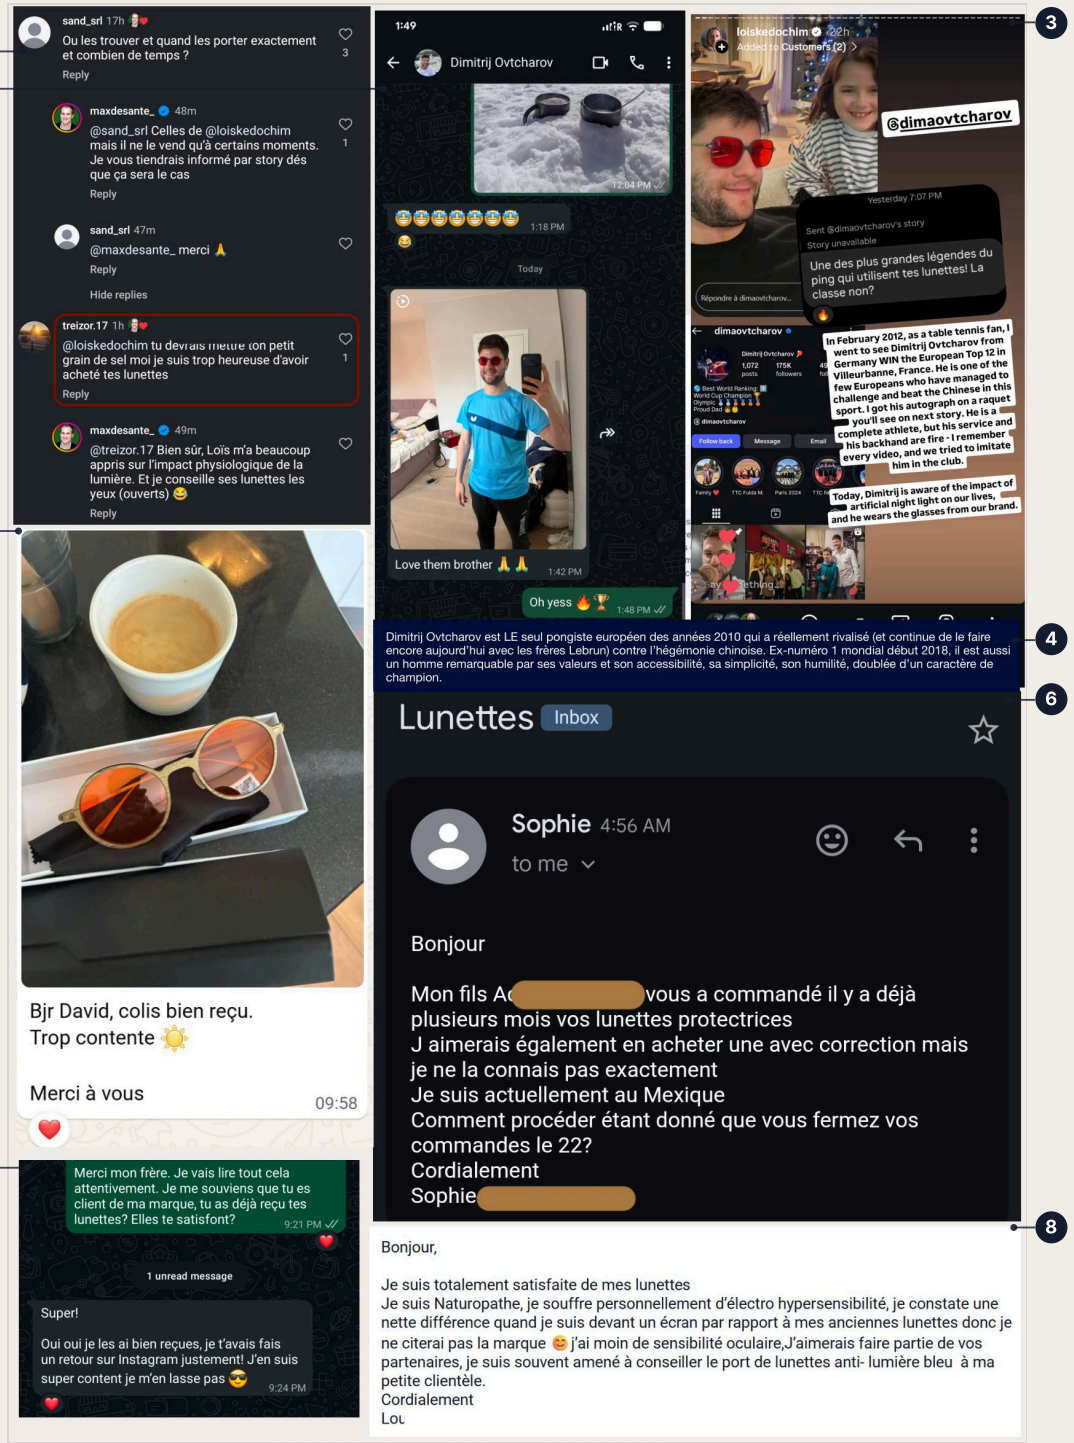

4 *Dimitrij Ovtcharov is THE only European table tennis player of the 2010s who truly competed (and still does today, alongside the Lebrun brothers) against Chinese hegemony. Former world number 1 in early 2018, he is also a remarkable man for his values and his approachability, his simplicity, his humility, along with a champion's character.*

We're even extremely satisfied. I'm promoting you all over Paris. It takes several months before some people start a new habit. So I have a spare pair that I lend out so people can try them. You come across lovely people because you attract them, and you really deserve it with all the work you put into your glasses!

By the way, I bought the glasses at the shop on rue de Longchamp.

The owner was lovely too and very professional! I came out delighted, which is rare, because I don't go to opticians often, since I often feel like I'm being sold bad products, but that wasn't the case here.

A RECOMMENDATION
Loïs Kedochim
loiskedochim.com

This guide rests on one central conviction: the light you let into your eyes (or protect them from) largely determines the health of your vision. That is precisely where Loïs Kedochim comes in: a rare brand, rooted in a deep and radical vision, that of protecting and honoring the living world in the face of an invasive artificial world. At the heart of its philosophy: nature above all, slowness, the long term and deliberate scarcity.

It doesn't sell mere objects, but lasting icons: NIGHT glasses that are ultra-effective against harmful blue light, made of compressed titanium with a carbon front; DAY glasses with the best transmittance of the available solar spectrum (with or without correction); but also Georgian craftsmanship (beeswax candles, living light with no paraffin or synthetics), wool clothing and fine leather goods, all united by the same compass: do little, but do it well, elevate taste, refuse volume and permanent promotions.

Price is sacred, marketing is absent; soul comes before growth. With an embodied founder, a loyal tribe and a fully embraced radicalism (limited drops, long deliveries, a refusal of conventional e-commerce), the brand is patiently building an authentic Maison.

Objects that last, quality or nothing, the detail that decides everything: to serve the truth.

2 *Customer quote*

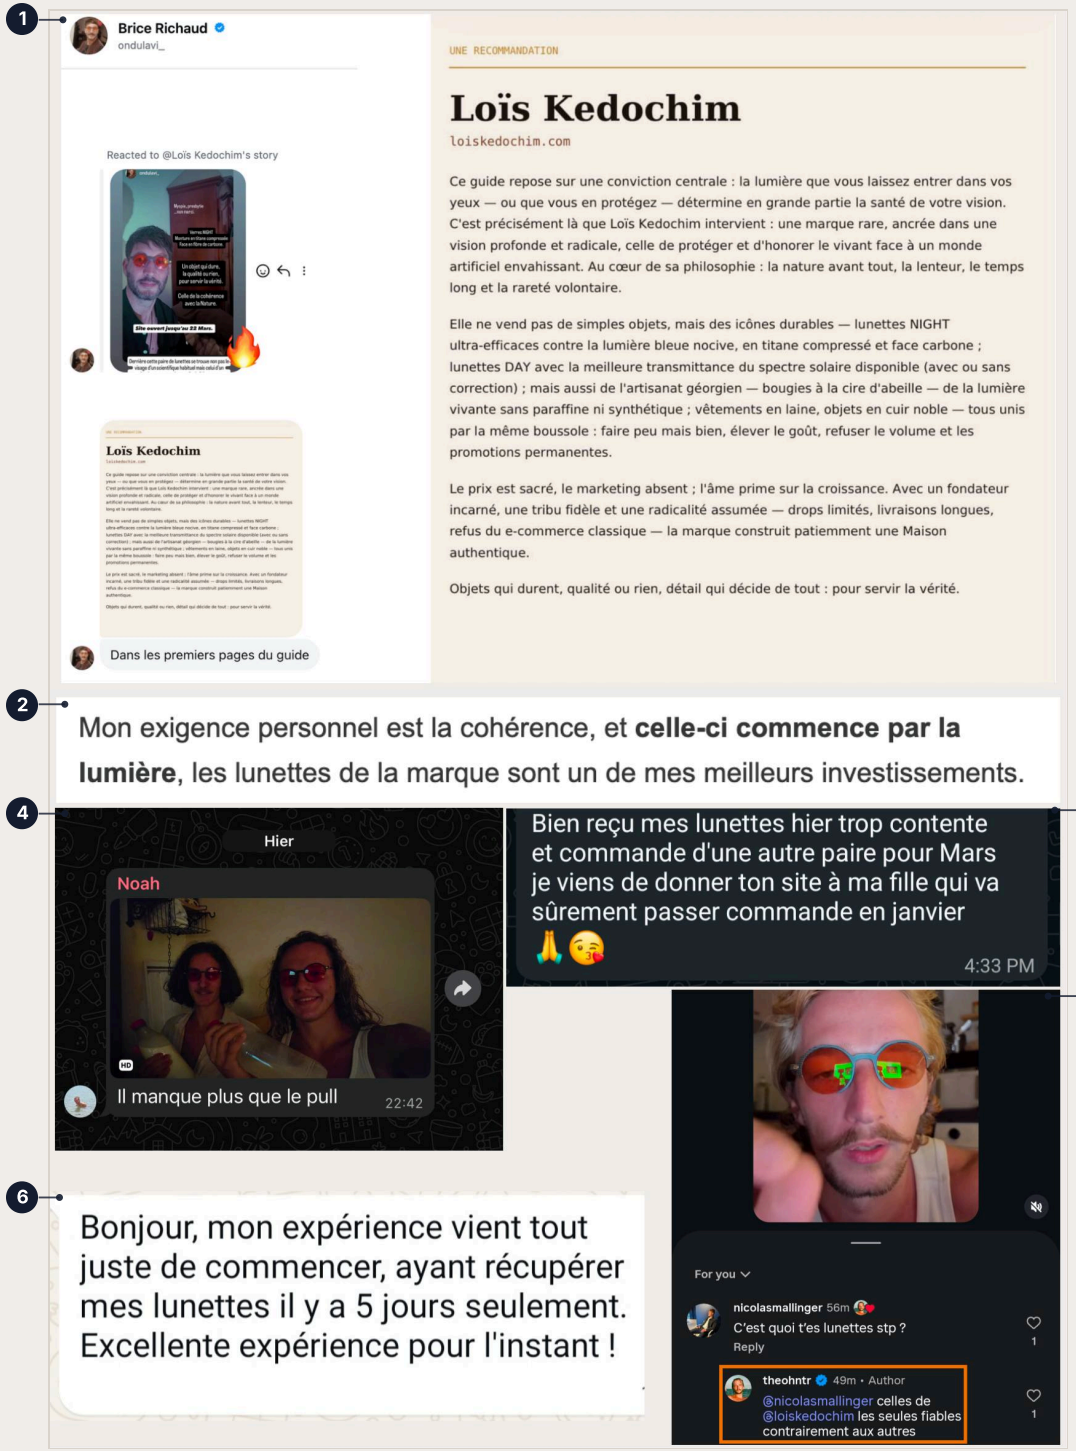

*My personal standard is consistency, and **that starts with light**. The brand's glasses are one of my best investments.*

Customer Hey man, is it possible to get a release date for the next glasses? I've been in the WhatsApp group for a while now and still nothing.

I'm waiting impatiently, but in vain

Customer Yes, I have a question: why not sell them all the time, why in the form of drops?

I assume there are obviously lots of factors, but you're probably losing money.

Thanks for your answer

Loïs I understand your question and I'm sorry about the frustration.

We'd rather do little, but do it with intensity. We're not a volume brand, we don't sell plastic glasses for biohacking. Each sales opening is a moment of its own, and despite the frustration for those who don't get to buy, in the end it's a way of respecting those who trust us.

Alicia Creating the wait can be part of the journey.. waiting for the next sales period makes me both excited and happy to keep learning until then, and to factor the impact of artificial light into my daily life before putting a band-aid on a sick lifestyle.. it's an extra motivation to change my life, not just buy a solution. Thank you for that 😉

Loïs You just perfectly explained one of the main reasons. I want people to understand first and foremost. Thank you

Thanks again for your call earlier this week and your advice. I was able to go see the glasses at the optician you recommended in Paris, and I'm sold! Even after trying them on, I'm still undecided on the type of lens, the Night 4 or the Night Pro, because I really want it to have an impact on my sleep, but I think I'll go with a Night 4 as advised, even if it means exchanging it later as you offered.

May God protect you, Loïs.

Summary of this year for me (I'm 43, a single mom, I'm leaving Paris for the countryside), and I'm looking for a river so I can manage to get my feet in it. (I discovered the Wim Hof style 10 years ago) And I just bought your glasses!

Thank you for everything you bring us, at your young age 🙏. You embody beautiful values, keep going... I also show your videos to my 7-and-a-half-year-old son, who's into guitar and cats, to show him an inspiring side of youth! I wish you a lovely end of the year and that all your dreams come true. 🤩

Loïs Thank you ❤️❤️

Customer I have one more question please, I bought your glasses, which are great THANK YOU, it says not to use them during the day, but when I'm on my phone during the day, do I have to wear them? A silly question ..

Loïs No, only wear them when the sky is dark. During the day, you need all the wavelengths the sun gives you (as soon as the sky has any light), and even in front of a screen, you absolutely need to take in these wavelengths.

I talk about it specifically in the first video on my website, and also here https://youtu.be/LuOt8OSjdXI?si=fEAmoVggFZslo_cy

Thank you for your precious advice, Loïs.
I'm putting all of that into practice too, and it changed my life.
Now I'm thinking about starting my own business.
But what.... I have to figure that out.
Because I'm an accountant shut up in an office, with coworkers who are cold and won't open the window 😩 in the city, in short everything that drains my energy.
On Wednesday I swam in the cold river water, it did me a world of good.
Have a lovely day 🌷🌞

Dear Loïs, bravo, bravo for your perseverance. In the language of the birds (the alchemists'), it means pierce through and you will see!! And it suits you well and is precious... I'm hopeless when it comes to understanding how to get your glasses, please can you help me?? Whatever's simplest for you. I know you have other things to do, sorry😶 I'm leaving for Mexico again at the end of October

Catherine Hello Loïs, congrats on your new website, and on the wonderful products you're featuring, straight from the artisans, it's wonderful. I won't buy this time because cash is a bit tight, but it's only temporary. I love everything, and I'm 100% in agreement with you. I know you probably don't agree with the supplements I recommend, probably even more so the essential oils (and the way they're produced, in agreement and harmony with the growers, harvesters, etc., who are also paid with no haggling, right after the distillation!). I also watched your video on Georgia, a country on my list, so! See you soon, Catherine

Loïs Thank you Catherine ❤️

Good evening, I've done a lot of research on your brand of blue light glasses and I think it's really superb. I had a question about the *LOVE model: do you have photos of this model worn by men? I can't really picture how it would look on me.

This way you can see my glasses clearly.

And we love the "Ligue contre le cancer" (the League Against Cancer), funded among others by the pharma groups... black r... anyway. Quite the crowd! And people believe it, they drink in every word. Since I started exposing myself to NATURal light, my eyesight has healed. Before my second pregnancy I had prescription glasses because I was starting to see less well from a distance. One day I came across lola calypso's Instagram, and I started exposing myself because during my pregnancy and afterward I had the time. A year later, no more need for glasses! True story, I even went back to see the eye doctor... and today I keep going, as soon as I have 5 minutes I go outside! Sport is outdoors! Even at night if need be 🤣🤣🤣 anyway. I can't stand those lobbies anymore. Thank you for being you. My son is a rebel like you and I'm proud of it ❤️❤️

I'm currently doing the experiment with sunglasses

I have light eyes,

green, ultrasensitive to light for as long as I can remember

I wore my sunglasses these past years from March to the end of October in Paris! Even lately, constantly whenever I was outdoors

I've been applying your advice for two months, no more sunglasses

At first it was hard, but the more time goes by, the more I notice that my eyes are getting used to the sun again and are less and less sensitive

I thought I was protecting my eyes with sunglasses, but no, I had to do the exact opposite, gradually get used to natural light again

Thank you 🙏

Next step, wearing my contact lenses less (I'm nearsighted -3, -3.5) I've started, I wear them for less time during the day but I feel I can do more

3 Instagram DM · customer

For your information, since I've been following you and experimenting on my own too, especially on the subject of sunscreen... since I stopped using it, my vitiligo on my face has disappeared, so.... The critics.... let them at least test it first...

Thank you for sharing your knowledge, your experience with us... it's up to us to make good use of it if we feel connected to that... I've even started doing push-ups, I'm making progress and it feels amazing 🙏

Thank you, I've been following your advice for several months 🙏 With my blue eyes and living in the south of France, I managed to stop wearing sunglasses altogether 🙏 and without spending my time crying 😂. And I've never liked lights at night, so for that, going to bed at 9:30 p.m. is fine too. I would still need glasses for driving, because that's hard in the summer. Which model would you recommend for me, and for a 13-year-old child who spends a good hour a day on screens?

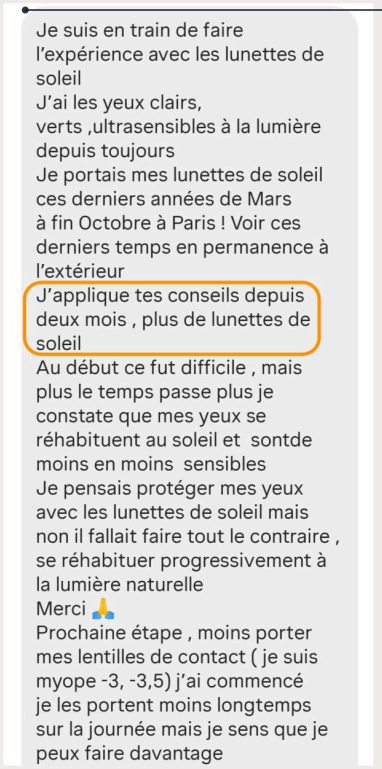

Thank you so much 🙏

The cause of melanoma

Customer Hi, I find your content very interesting and I thank you for your research and sharing.

My mom, who is 65, developed a melanoma, not very extensive but present all the same, which was surgically removed.

So two questions: what are the common causes of its appearance, and how can the situation be reversed?

Thank you!

True story. My mother worked nights for 20 years, so she slept during the day from 7 a.m. to 3 p.m. and went back to work at the factory at night under blue lights. She wasn't exposed to the sun, she had a melanoma, now she's cured (and she quit her job right after)

I've also always felt, instinctively, what I really needed and what I was really missing to feel good: food, sports, etc. Sure, those help, but natural light is really the most important and the biggest game changer, and all of this reinforces my instinct even more now, that the key piece I was missing is getting more exposure to natural light and protecting myself from artificial lights in the evening, and in the end you can't have one without the other. I'm just eager to test your glasses and support your brand, and I already speak well of it to the people around me, even though I still don't have them in my hands.

Quoted message Creating the wait can be part of the journey.. waiting for the next sales period makes me both excited and happy to keep learning until then, and to factor the impact of artificial light into my daily life before putting a band-aid on a sick lifestyle.. it's an extra motivation to change my life, not just buy a solution. Thank you for that 😉

Loïs You just perfectly explained one of the main reasons. I want people to understand first and foremost. Thank you

Customer Totally agree, these days I'm capturing, I'm stealing every minute and hour of sun between the storms, and I've changed the way I see my days so I get the different light spectrums of the day... Well, I'm still here writing at night without your sublime glasses, but it'll come in due time

Loïs's story *Give a man a fish, and he'll eat for a day.*

Teach him to fish, and he'll eat for a lifetime.

I get several requests for my opinion on this or that brand of glasses.

I've made hundreds of videos on the theme of light (natural, artificial) and its modern forms.

I've called out biological inconsistencies out of a desire to see humans in better health, not to call out those behind them.

Facts speak much louder than words, and I've shown it clearly, with an eye toward building for the long term.

A brand that respects itself doesn't call out other players who sell similar products.

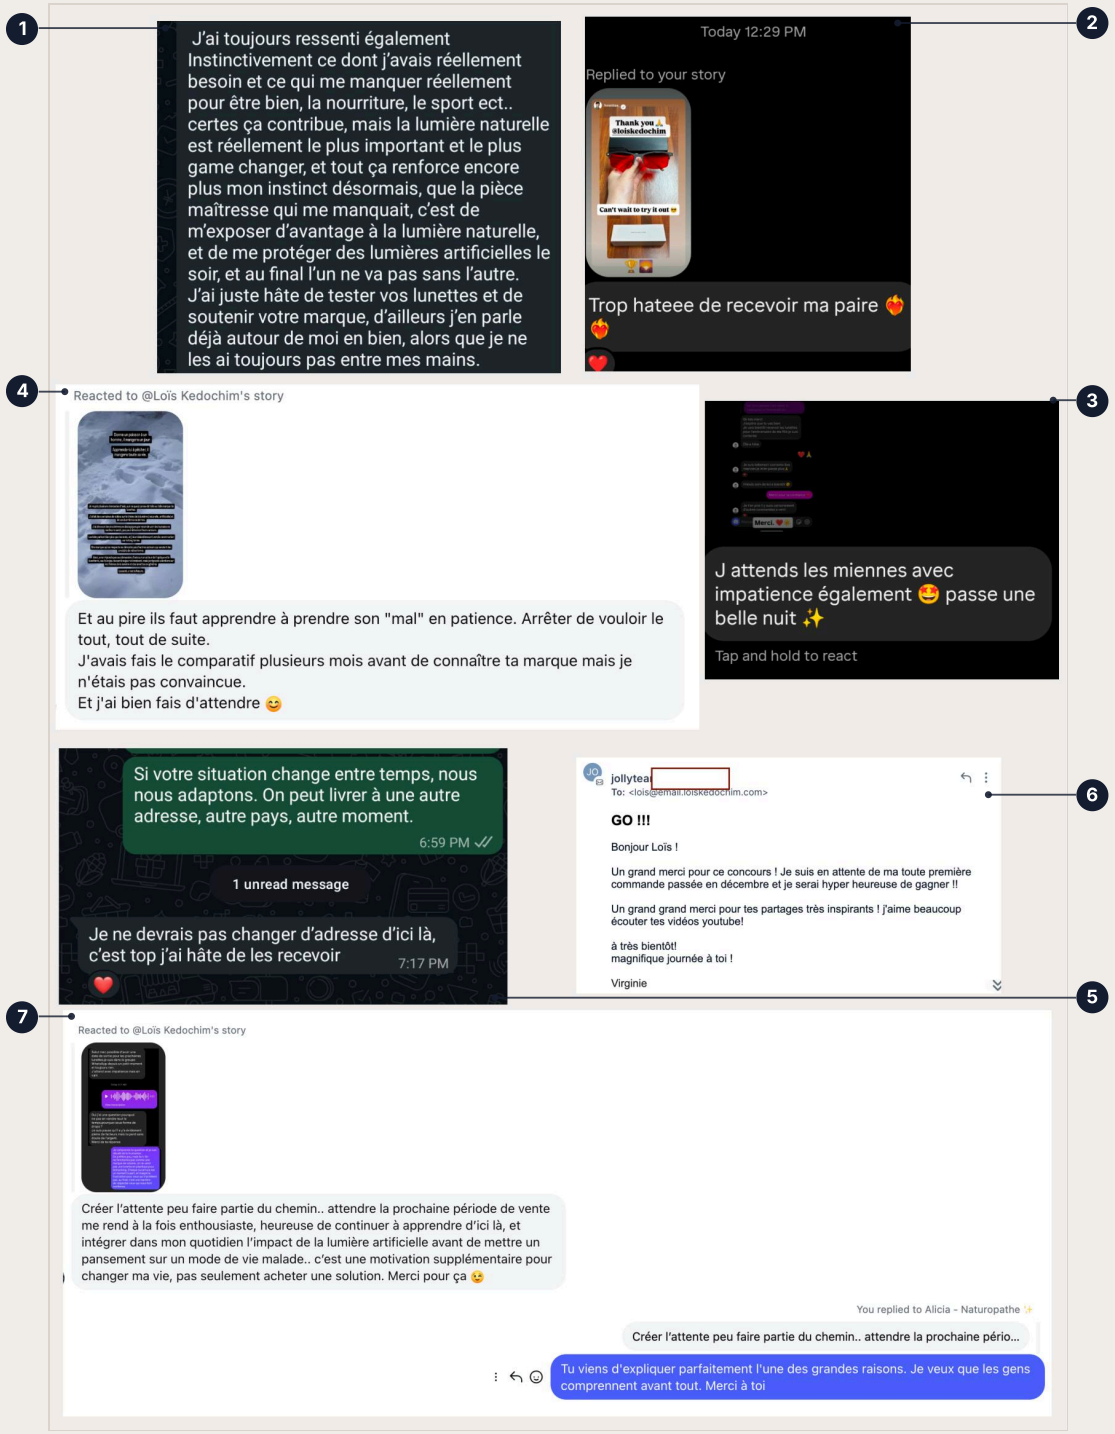

So I don't answer requests for opinions about a player in the optical and eyewear industry, unless there's a major and imminent health issue, but I'm glad to answer on the themes of light and glasses in general.

Health is Nature.

Customer And at worst, you have to learn to bear the “pain” patiently. Stop wanting everything, right now.

I had done the comparison several months before I knew your brand but I wasn't convinced.

And I was right to wait 😊

5 WhatsApp · Loïs and customer

Customer Hey man, is it possible to get a release date for the next glasses? I've been in the WhatsApp group for a while now and still nothing.

I'm waiting impatiently, but in vain

Customer Yes, I have a question: why not sell them all the time, why in the form of drops?

I assume there are obviously lots of factors, but you're probably losing money.

Thanks for your answer

Loïs I understand your question and I'm sorry about the frustration.

We'd rather do little, but do it with intensity. We're not a volume brand, we don't sell plastic glasses for biohacking. Each sales opening is a moment of its own, and despite the frustration for those who don't get to buy, in the end it's a way of respecting those who trust us.

Yo Noah, I have to give you some feedback haha, I'll tell you right away: you were right
I didn't have the money to buy on Loïs's website (€180 or so) and I found the brand [name hidden] from [name hidden] (€95)
But I really regret it now!
There were fake reviews on the website: it said 217 5-star reviews but it was impossible to see those reviews. Impossible to get package tracking, and communication with the brand was almost impossible.
In the end I did get them, but they're nothing amazing, and on top of that they're too small for my head
I'm so bummed

   It's really silly that I let myself get influenced

2. *Context:*
   One day, an "ancestral" influencer criticized the Maison's glasses and called the founder (Loïs) an "influ-thief." He wasn't a customer of the Maison, and he recommended glasses bought on Amazon to his community.
   Someone who followed him happened to be a recent customer. When he started wondering whether to keep his glasses, Loïs directly offered him a return and a full refund. After a few exchanges, he accepted.

3. *After comparing his experience with a new pair of glasses, he decided to backtrack and ask to have his glasses from the Maison Loïs Kedochim sent to him again.*

UNDERSTANDING THE BASICS.

1. 5 min 27 - https://youtu.be/fyviAbCgcKE?si=NH7QCGNDUTa71piV

Là où l'optique s'est trompée. (Where optics went wrong.)

The angle of this video is deliberately specific, that of eyeglass lenses, whereas the video is really about a realization for your life as a human being, whatever your visual acuity. Three facts stand out: clear lenses block none of the modern artificial light (because they block wavelengths that are not even emitted by our light sources); Loïs Kedochim lenses are effective and smart depending on your light environment, and for everyone; the impact on health is profound and wide-ranging (melatonin, mood, metabolism and therefore eating behavior, focus, nervous system, migraines, intuition). In this video, you actually come to understand that the subject of glasses belongs first to the subject of light and darkness, and that the latter happens to be the major hidden player in your quest for health and, as a result, personal fulfillment.

2. 17 min 52 - https://youtu.be/Fh6nFJNY6DU?si=em3f9ipW_JZC1-0V

Le soleil est votre allié. (The sun is your ally.)

Once our minds open to reality, and at the same time to the possibility of past indoctrination, the sun appears as a celestial body or luminary totally devoid of anything dangerous to any living being, and endowed with the greatest and most crucial benefits, which all your ancestors enjoyed almost without restraint. In this video, Loïs Kedochim lays out the most logical, basic and advanced arguments, the most obvious facts and demonstrations, to show the absurdity of the reasoning and the pseudo-proofs that authority has had you accept over the course of your life through repetition and neuro-behavioral control. And once the sun appears as an **inevitable** answer, the veil that reigned over your field of possibilities, and in particular over that of your personal potential, begins to lift.

3. 12 min 52 - https://youtu.be/zRkQRBq1fSQ?si=zR7t2bOWDRAoXTFu

La lumière de notre monde au spectromètre. (Our world's light through a spectrometer.)

Nighttime artificial blue light is unavoidable in the modern world, even in a small village, even if we switch our screens to red. Nobody suspected such omnipresence, but reality is just one spectrometer reading away. When we know that white artificial light actually emits a blue light peak, which happens to sit on the exact wavelength of our biological sensitivity peak, and at the worst possible moment for our biology (during our nighttime periods), we understand that this artificial light amounts to a real, underestimated poison, on a par with tobacco, energy drinks and refined sugar, but even more insidious and impossible to control regardless of our will.

UNDERSTANDING THE BASICS. *(continued)*

4. 22 min 08 - https://youtu.be/i3nHSVPu5QM?si=Rhj6Ts5tE9_VGi0X

Lumière bleue, tout comprendre. (Blue light, fully explained.)

The circadian rhythm is the foundation of our Life, and our eyes' exposure to light is the first thing that regulates it. It has always been respected throughout our History, yet it is precisely this exposure that is disrupted in the modern world: a chronic lack of natural daytime light (leaving human beings unable to use solar energy), and chronic overexposure to modern nighttime artificial light (leaving human beings both unable to repair themselves at night and unable to sharpen their intuitive faculties again).

Second message: Since 2023, when no commercial player with logical and scientific foundations was communicating about the importance of natural light during the day, the early days of the Maison Loïs Kedochim already show a subtle but also practical understanding of our need to set our light environment correctly, and of the best ways to do so.

5. 6 min 25 - https://youtu.be/ZMwp729qsH8

La lumière bleue, c'est vrai. (Blue light is real.)

In one example among hundreds of others, for people who no longer know how (or don't yet) to instinctively feel the toxic nature of artificial light, understanding is only two clicks away: the scientific foundations put forward by the best researchers in the most prestigious journals on the importance of intelligently protecting ourselves from artificial light in front of our eyes during our physiological nighttime periods. It's all about timing, and light and darkness are no exception: they are in fact the best examples of it.

6. 14 min 48 - https://youtu.be/-kDF_9aveyk?si=Gz1VfxQ0C4gYfGoM

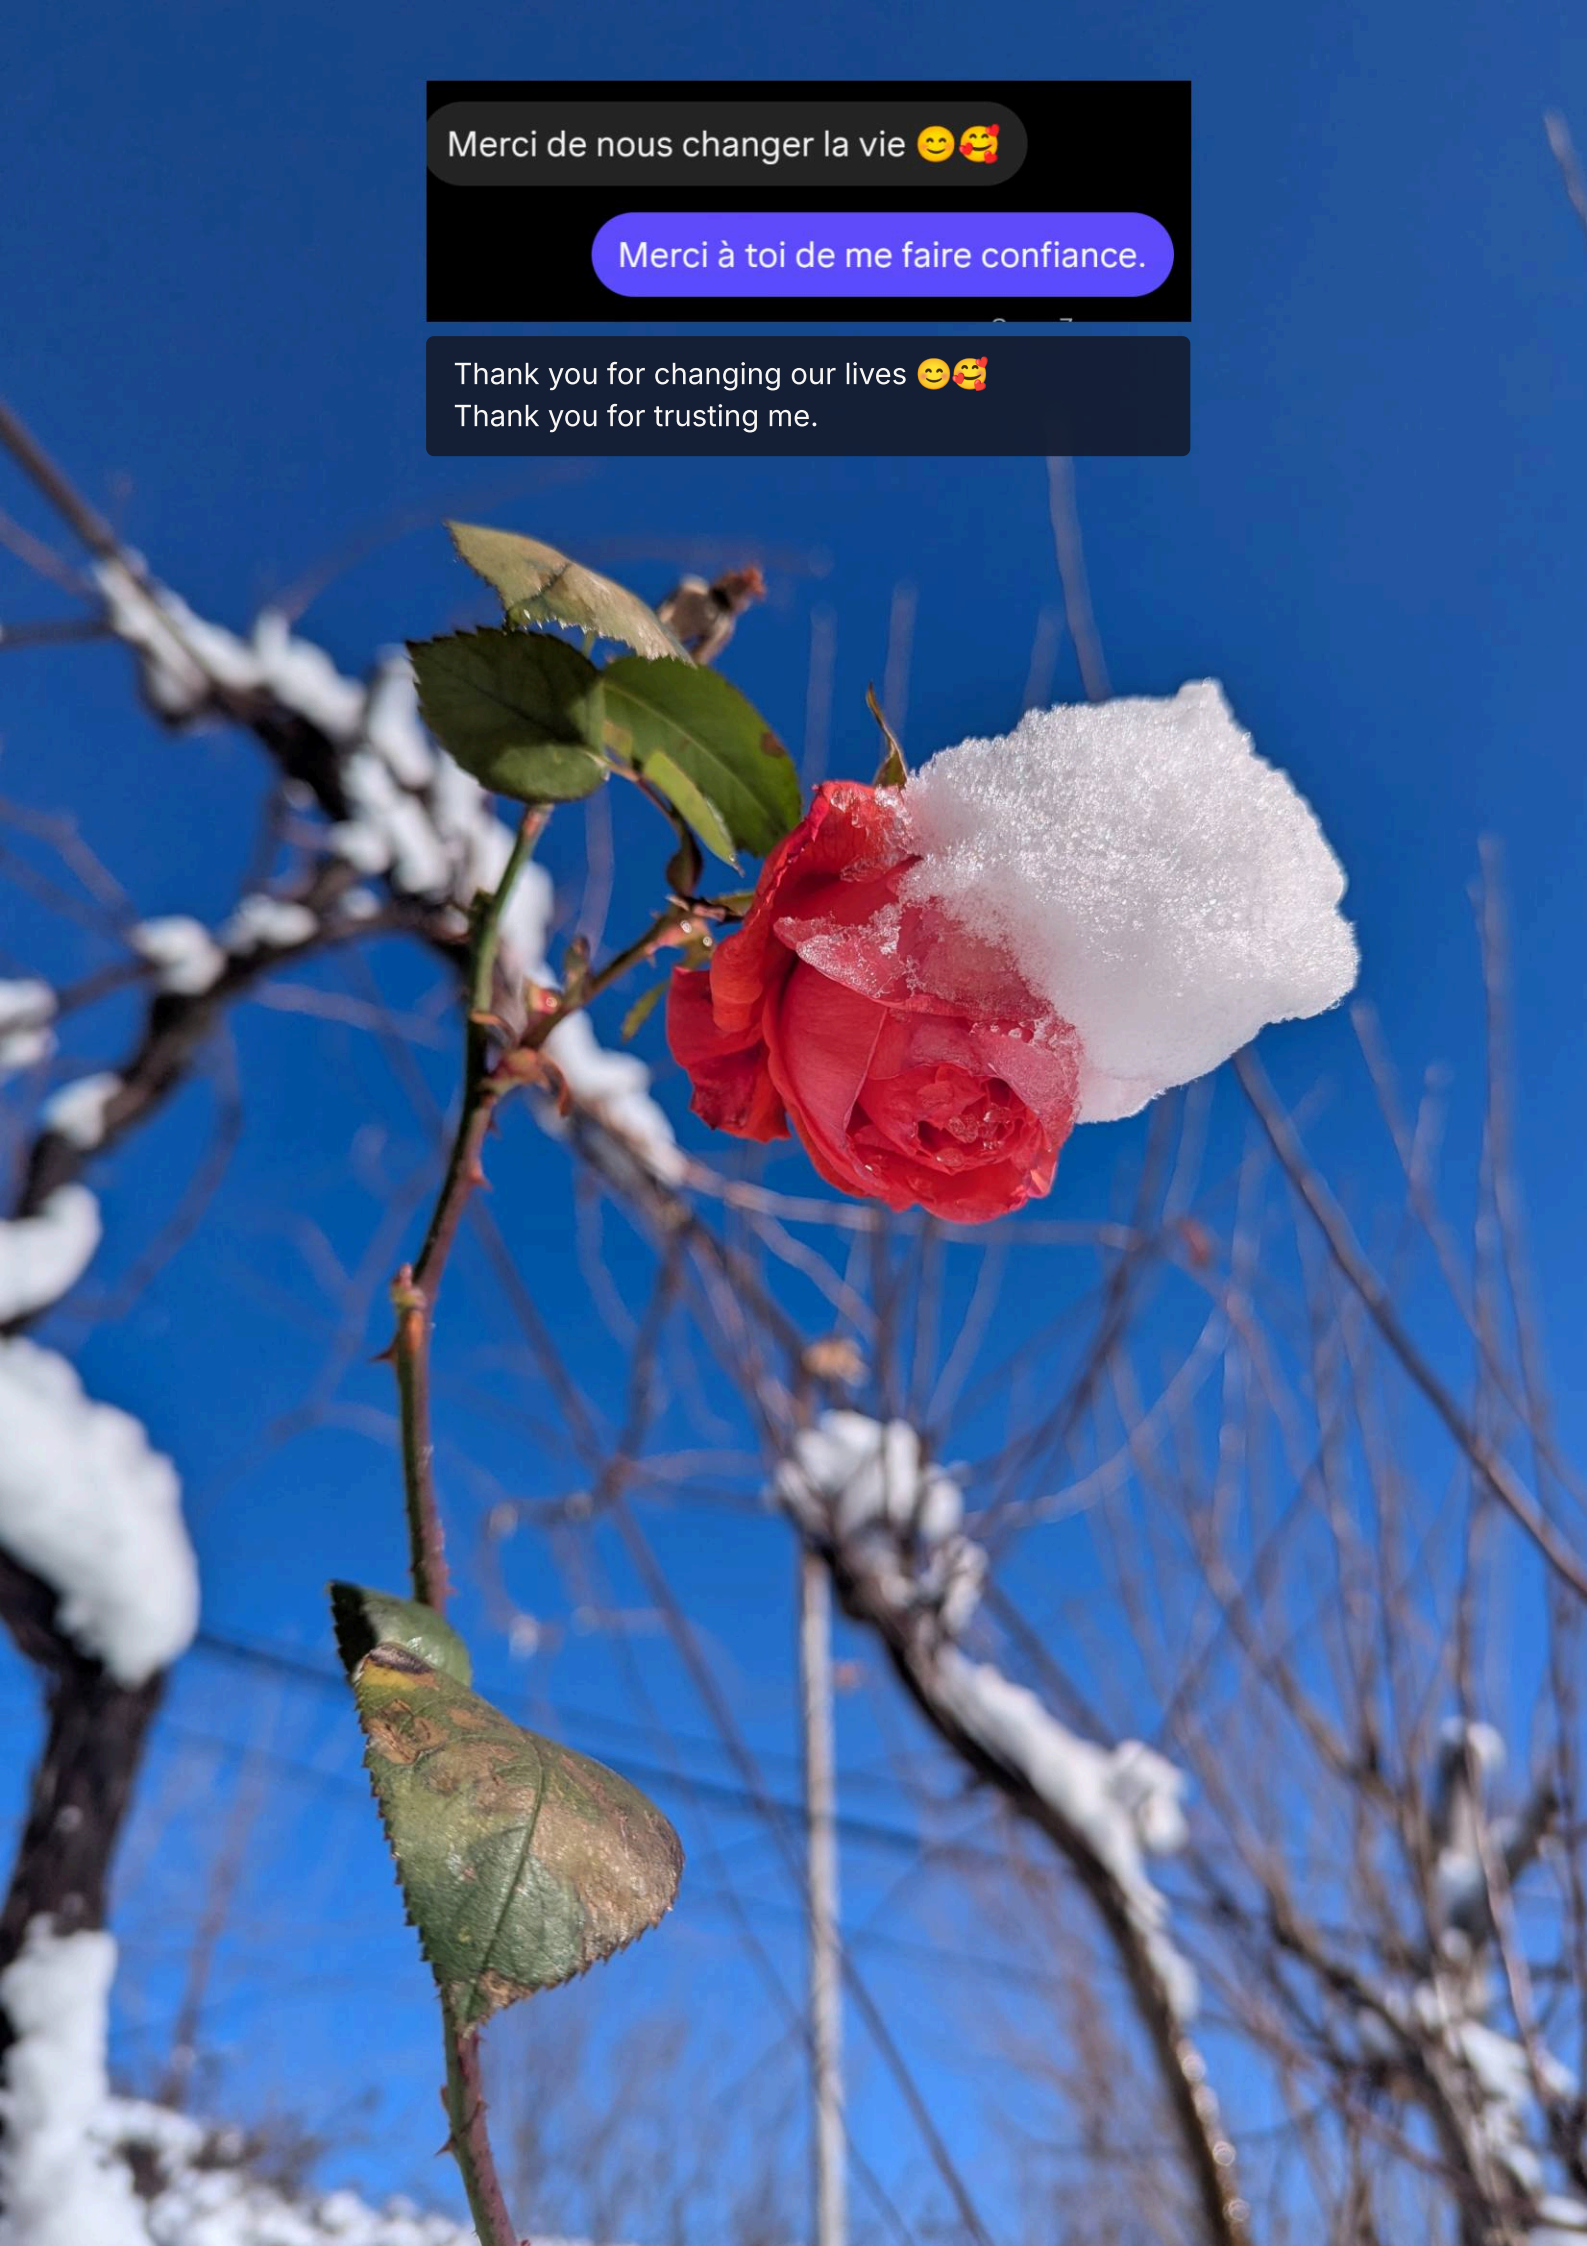

La majorité des lunettes anti-lumière bleue n'a pas d'efficacité clinique. (Most blue light glasses have no clinical efficacy.)

It is easy to demonstrate, plainly, a disappointing deception: the ineffectiveness of the lenses sold by the major optical chains, opticians and blue light glasses brands, as well as their harmful nature when worn during the day. The Maison Loïs Kedochim did so early on, in 2023, and has never since departed from the physical and biological rules mentioned.

7. 44 min 35 - https://youtu.be/tkakZIpcAZE?si=zrYBh89RTIQ02CNE

La véritable raison pour laquelle votre santé est sous-optimale. (The real reason your health is suboptimal.)

While only the false leads of "dietary" "supplements," gyms / Hyrox, creams and infrared LED panels are presented to you through invasive, repetitive marketing campaigns, the essential, the Source, remains invisible: the sun, its perceived movement across the sky, the night, but also the reality of the chronic and intense disregard for this circadian and seasonal phenomenon by human society. Together with your simultaneous disconnection from the Earth, this is the real number one reason for your chronic fatigue, your focus problems, your metabolic and therefore eating problems, your lack of motivation, and your loss of meaning in your sacred life.
